

FluClinic2You

Protect Your People - Wherever They Work

Corporate Flu Vouchers 2026-27

Flexible, nationwide flu vaccination access for modern teams.

Why Protect Against Seasonal Flu?

Seasonal influenza is a highly contagious respiratory illness that spreads easily in workplaces and shared environments.

- Employees with flu miss an average of 5+ working days
- Productivity can remain reduced even after returning to work
- Easily transmitted through close contact and shared surfaces
- UK businesses lose ~**£338** per employee annually due to flu-related absence

Preventing flu
protects your people,
reduces disruption,
and supports a more
resilient organisation.

Flu is more than just a cold - it can significantly impact workforce health and business continuity.

Evidence / Sources:

NHS (2024): www.nhs.uk/conditions/flu/ • PharmacoEconomics (2022) - Cost of influenza-related absenteeism

UK Health Security Agency (2024): www.gov.uk/government/collections/seasonal-influenza-guidance-data-and-analysis

Reaching Every Employee

Today's organisations are more flexible than ever:

- Remote and hybrid teams
- Multiple office locations
- Field-based or shift workers
- Busy school staff with limited time during the day
- Staff working across different sites or schedules

Traditional on-site clinics don't always reach everyone.

Result: Gaps in vaccination coverage can increase the risk of flu spreading across your organisation.

Nationwide Vaccination Vouchers

Our voucher service ensures every employee
can access protection - wherever they are.

- Redeemable at 2,000+ pharmacies nationwide
- Convenient access near home or work
- Flexible booking to suit individual schedules
- No need to attend a central clinic

Simple to manage: one
activation code covers
your entire workforce.
