

THE AWARDS ASIA 2021

Teaching and Learning Strategy of the Year

Institution name	Airlangga University
Submission title or project name	Sustainable Education for All
Nominee/key personnel	Dr. Muhammad Miftahussurur M.Kes., Sp.PD-KGEH., PhD
URL	
Submission	<p>To ensure our graduates more closely meet industry demand, Universitas Airlangga (UNAIR) initiated a program themed 'Sustainable Education for All' which aims to improve the relevance and employability of graduates. This program is strengthened by Inter-Professional Education (IPE) activities and the Outcome-Based Education (OBE) approach.</p> <p>IPE activities aim to prepare students to work between professions in a collaborative environment. With the Outcome-Based Education (OBE) approach, learning strategies are carried out using project-based and evidence-based learning methods.</p> <p>Teaching and learning activities in the university also employ technology through a Learning Management System (LMS) which is accessible via the web or mobile app: elearning.unair.ac.id (AULA) dan Airlangga Learning in Mobile App (ALMA).</p> <p>Additionally, UNAIR has Massive Online Open Course (MOOC) which can also be accessed by the general public. The university also collaborates with industry and business parties to improve the students' competencies in the professional world.</p>
