<b>URL</b>	<a href="http://sustainability.undip.ac.id/">http://sustainability.undip.ac.id/</a>
<b>Submission</b>	<p>Our Rector, under the coordination of the Vice-Rector for Research and Innovation, initiated at least two milestones to promote Green Campus and Sustainability.</p> <p>The first was establishing and SDGs Center that serves as a focal point to redefine, sharpen, and continuously increase the university's effort and commitment to environmental sustainability and development. One SDGs Center board member is an UNDIP multidisciplinary expert, in line with the UNDIP role as the leading university in Indonesia with a strong focus on interdisciplinary work in Engineering and Technology, Sciences, Medical, Law, Economics, etc.</p> <p>The second is the inclusion of SDGs practices in the thematic community services program in which the SDGs Center may be able to steer the program in line with SDG indicators. The result was exceptional: by 2020, UNDIP has become the second most sustainable university in Indonesia and 39th in the world by the UI GreenMetric World University Ranking.</p>
