Submission | In many ways, LASALLE continues to achieve excellence and innovation in the Arts.  
LASALLE was championing the use of new technologies and innovation to enhance students’ learning experiences even prior to the pandemic. Our Dance and Musical Theatre programmes experimented with the use of Virtual Reality (VR) headsets and visualisations in classes, while our Acting and Theatre Production and Management programmes have been exploring the use of technology in their training methods, using telepresence and a software programme respectively.  
LASALLE’s ambitious research strategy has propelled the College to become one of the few Asian institutions to independently support research, consistently creating excellent studies of local and regional arts, practice-based output and industry collaborations to promote the development of the arts. We not only enrich the educational experience but also lead and develop creative sectors through industry partnerships as well.
