| Submission | <p>A support package called “O-AMAS-Based Flipped Classroom” was created by Nankai Effective Teaching. In O-AMAS, O is standing for instructional objective, and A, M, A, S for four steps of a single lesson, namely activation, multi-learning, assessment, and summary. Lower instructional objectives are mainly achieved by students’online-studying before class, while higher ones are achieved in off-line class organized by O-AMAS. Together with O-AMAS, two practical teaching tools were developed: one is the “Class-Design-Table” and the other the Checklist.</p> <p>A book introducing O-AMAS framework and 99 related teaching activities has been published.</p> <p>Two online courses about O-AMAS have been developed and are open for teachers nationwide. So far, over 2,000 teachers in China have been trained to use this package.</p> <p>As a result, most students involve in learning activities more happily and master the knowledge more quickly. Their transferable skills, such as problem solving, critical thinking, creativity, communication, social skills, etc. enhanced impressively.</p> |
