

THE Awards 2019 – Technological or Digital Innovation of the Year

Institution/Nominee	Liverpool School of Tropical Medicine
Title	The Weston Active Learning Laboratory
Key personnel	<p><u>Liverpool School of Tropical Medicine</u> Technology Enhanced Learning (TEL) team Communications team Fundraising team.</p> <p><u>Industry partner</u> Roche AV</p>
Submission	<p>LSTM's Weston Active Learning Laboratory (ALL) is a cutting-edge, multifunctional learning environment which offers students a unique teaching and collaborative experience, contributing to LSTM's aim of being the 'go-to' institutional for the training of global health professionals and leaders of the future.</p> <p>In addition to providing a dynamic and interactive teaching environment, the facility also allows Lecturers to manipulate the conditions of field-based scenarios, presenting similar conditions but different challenges to each group simultaneously, thus creating multiple learning points in one session.</p> <p>The ALL was also designed to support international research consortia, industry collaboration and public engagement activity. Ultimately, the facility will support the development of key skills in graduates who will be leading the response to future global health challenges facing the world; skills that our industry partners in the health, research and humanitarian sectors have identified as urgently needed.</p>
