DRIVING PROGRESS IN ELECTROMOBILITY

As our first all-electric trucks especially made for inner city working, the Volvo FL Electric and the Volvo FE Electric mark an important step in our strive towards our vision of zero emissions.

We offer our customers a smooth transition through tailored transport solutions with maximum uptime and productivity, all backed by the security of Volvo Trucks' dealer network.

Volvo Trucks. Driving Progress

welcome

Welcome to the fourth annual Freight in the City Expo at London's magnificent Alexandra Palace

We're delighted to once more create a forum to debate the challenges and explore the opportunities that continue to emerge in the urban logistics sector.

Whether this be the expanding network of clean air zones under consultation, demand for smarter urban warehousing, or the continuous drive to make UK roads safer for all users, we've got it covered in today's agenda.

A full seminar programme will be taking place across three themed sessions (see p6 & p8), while our exhibition hall is packed with the latest trucks,

vans, equipment and services to enhance your city operation.

New this year is the Compliance Zone, situated in the main exhibition hall. Here you can speak with experts about any fleet compliance issues, from counter-terrorism advice through to avoiding PCNs and alternative fuels. See p4 for more details.

You can also drop in during the morning break or over lunch to our Knowledge Zone stage and hear quick-fire presentations on topics ranging from the latest Innovate UK vehicle trials, through to updates from Transport for London on its

pending Direct Vision Standard. See p4 for a full schedule.

We'd like to extend a huge thank you to our event partner Scania, as well as our seminar partner Calor and our supporting partners Energy Saving Trust, FTA and Noise Abatement Society.

We do hope you enjoy Freight in the City Expo 2018!

Hayley Pink
Urban Editor
Freight in the City

Welcome from our event partner

The UK is experiencing change at a rapid pace with the introduction of increased legislation to help make cities cleaner, quieter and safer for the millions who work and live in them. We work with stakeholders, navigating through these changes and plan for the future with our customers offering 'here and now' urban transport solutions, tailored for individual applications.

We're all part of a transport ecosystem, and just as in any successful system, everyone has a very important role to play. When

our new truck generation was launched in 2016, our aim was clear, 'Driving the shift towards sustainable transport', and we're putting those words into action.

Safety and sustainability are two of our top priorities; this is reflected in our newly developed product range for urban transport. Our range of cabs

on show offer enhanced safety features with the exhibited L-cab achieving the maximum five star Direct Vision standard.

The future of urban transport can't be solved with just one solution, therefore we offer a range of alternatively fuelled vehicles.

We look forward to welcoming you to our stands to show you around our range of urban transport solutions and discuss with you how they can be tailored to your business. Enjoy the show!

FREIGHT in the CITY EXPO

Knowledge Zone

Head along to our brand-new Knowledge Zone this year in the exhibition hall to hear a series of inspiring talks on key urban logistics topics.

Quick-fire 10-minute presentations will be running in the morning and over lunchtime, enabling visitors to grab a coffee and join in with those sessions relevant for their own business.

AGENDA:

Session one – Morning Break Time

11:00 **Update on technology trials for urban freight and logistics sector**

Venn Chesterton, *ULEV Innovation Lead, Innovate UK*

11:10 **Refrigerated technology and cabin heating system that does not affect an electric vehicle's range**

Sarah Bee, *Projects Director, Trakm8*

Session two – Lunch Break Time

13:10 **Electric rail freight potential for city centre deliveries**

Chris Polack, *Rail Freight Forum, CILT*

13:20 **Update on Direct Vision Standard in London**

Alina Tuerk, *Delivery Planning Manager, Transport for London*

13:30 **Scania talks physical product design, connectivity and safety for urban operation**

Phil Rootham, *Pre-Sales Technical Manager, Scania GB*

13:40 **DVSA highlights key enforcement activities for city operators and updates on Earned Recognition Scheme**

David Wood, *Enforcement Policy Manager, Driver and Vehicle Standards Agency*

13:50 **Shell GTL has been successfully used in London as a drop-in diesel alternative, with no vehicle modifications needed**

Andrew Goodwin, *National Bunker Manager, Certas Energy*

14:00 **Find out how Spanish-based start-up OnTruck uses its algorithm-based technology to connect shippers with hauliers**

David Jennison, *Managing Director, OnTruck UK*

Compliance Zone

Our brand-new Compliance Zone, located in the hall, is the place to head for any guidance you may need on operating cleanly, safely and efficiently in urban areas.

Clean Air Zone and Ultra Low Emission Zone guidance: speak with experts from the Freight Transport Association, Transport for London, Low Carbon Vehicle Partnership and Energy Saving Trust for all you need to know about meeting new emissions requirements in major UK cities.

Direct Vision Standard: Speak to the dedicated DVS team at Transport for London to get the latest update on the scheme's rollout and any advice or support you need to prepare your own fleet.

Safe and secure: The Metropolitan Police will be on hand to offer advice on load security, safer parking, anti-terrorism procedures and enforcement priorities.

Enforcement priorities: Find out more about joining the DVSA's Earned Recognition scheme and what the agency's key enforcement activities are focused on.

Loading and unloading: The Freight Transport Association will be on hand to offer support and guidance on the challenge of delivering to inner city locations and avoiding penalty charge notices.

Cleaner fleets: The Low Carbon Vehicle Partnership, LoCITY and Energy Saving Trust will be on hand to offer impartial guidance on exploring new vehicle technologies on your fleet, including alternative fuels and retrofit.

Out-of-hours deliveries: Come and speak with Transport for London and the Freight Transport Association if you'd like to unlock potential efficiency gains from retiming your city deliveries.

ELITE 6: THE CLEAR CHOICE FOR A HIGH PERFORMANCE SOLUTION

The Elite 6 is a premium quality, British manufactured vehicle designed to integrate within the communities in which it operates.

Awarded 5 stars in TFL's interim DVS standard.

FREIGHT in the **CITY** EXPO

Seminar Partner

Seminar partner for the 2018 Expo, Calor will be on stand S01, promoting its sustainable fuels for freight operators

The organisation will showcase how its competitively-priced fuel solutions – including liquefied natural gas (LNG) and new BioLPG – provide a low-carbon and cleaner option for hauliers operating in clean air and low emission zones. Many manufacturers, including Volvo Trucks, Iveco and Scania, are now offering gas trucks in the UK as part of their fleet ranges.

Offering economical and efficient alternatives to conventional fuels, Calor LNG and BioLPG deliver sustainable solutions to hauliers, without impacting on vehicles' performance.

To find out more please visit Stand S01

SEMINAR PROGRAMME - SESSION ONE

09:10 Welcome from Victoria Fritz, Transport Correspondent

09:15 – 09:30 **Keynote: Mega trends shaping the future of urban logistics**

The transportation and logistics industry is undergoing a period of accelerating change and rapid technological advances. A range of trends, including a changing retail landscape, shifting customer expectations, connectivity and convergence, digital transformation and new business models, are giving rise to an exciting set of opportunities as well as complex challenges. This talk will provide an overview of the Mega Trends impacting our cities and how these will impact the urban freight and logistics sector.

Lynne Goulding, Principal Consultant, Visionary Innovation Group, Frost & Sullivan

09:30 – 10:45 **SESSION ONE: EMISSION CONTROL**

We bring together experts to explore how air quality strategy will affect the urban freight sector, with a look at clean air zones, zero-emission ambition and low-emission vehicle trends emerging both in the UK and around the world.

• **Road to Zero – the freight sector journey: Bob Moran, Deputy Director, Head of Environment Strategy, Department for Transport**

An overview of the government's strategy in transitioning towards zero-emission vehicles and the role the freight and logistics sector will play in these ambitious plans.

• **The challenge of localised emissions regulations: Natalie Chapman, Head of Urban Policy and South of England, Freight Transport Association**

The Freight Transport Association will tackle the emerging challenge of localised air quality initiatives, such as clean air zones, street-specific diesel bans, and how lack of consideration for freight vehicles can have serious implications for the supply chain.

• **Retrofit for HGVs: Andy Eastlake, Managing Director, Low Carbon Vehicle Partnership**

Learn about the Clean Vehicle Retrofit Accreditation Scheme and progress in technology suitable for helping non Euro-6 HGVs comply with city emissions regulations.

• **Alternative fuel trends, a global city perspective: Tim Campbell, Director, Vahana Automotive**
Urban environments are destined to be one of the key battlegrounds and challenges for global commercial vehicle manufacturers and operators, so this session will highlight trends taking place in major cities across the world.

• **Q&A and debate on air quality issues**

10:45 – 11:30 Coffee, Networking and Knowledge Zone

BLIND SPOTS

IN HEAVY GOODS AND CONSTRUCTION VEHICLES

ASTRA CLEARVIEW – LOW LEVEL PASSENGER DOOR WINDOWS

HELP TO IMPROVE DIRECT VISION BY REDUCING THE BLIND SPOT AREA.

ASTRA CLEARVIEW Innovation ensures safer roads

Astra ClearView Low level passenger side window. The safer way to drive in the urban jungle. Nationwide fitting service available for all models of DAF, Iveco, MAN, Scania & Volvo brands.

- Unique concept originated by Astra which allows the main passenger window to remain fully operational
- Large low level window area, vented to aid demisting
- Secure, fully bonded "e" marked, automotive standard, toughened glass.

Talk to the experts:

- Wheelbase alterations
- Chassis repackaging
- ADR conversions EX to SLP
- Axle installations
- Mini artic conversions
- CLOCS compliance products – cycle minder systems and passenger door windows
- Specialist exhaust conversions

ID:A00432

Cheshire based company is leading the way in helping to make our roads safer and help cut down on fatal accidents for cyclists.

'One stop shop, for CLOCS scheme compliance' we also supply and install cycle detection systems and cameras.

**FIRST CALL FOR SPECIALIST VEHICLE ENGINEERING
(CHASSIS MODIFICATION & VEHICLE CONVERSIONS)**

sales@astra-vt.com | www.astra-vt.com

SESSION TWO

11:30 – 13:00 SESSION TWO: INSPIRING CHANGE

Discussing exciting projects taking place today with leading commercial vehicle operators to drive safety and sustainability across their fleets.

- **Direct vision in action: Gordon Sutherland, Traffic & Road Logistics Manager, Tideway and Tim Hapgood, Principal Transport Planner, Peter Brett Associates**
Find out how the introduction of low-entry cab (direct vision) vehicles into the Tideway project supply chain have performed, and their impact on the project and its legacy plan.
- **Rethinking the last mile: Ian Clough, MD Network Logistics and Transport, DHL Supply Chain**
DHL Supply Chain will share its knowledge in adopting new, sustainable approaches to the final mile that are cost effective, low risk and simple for industry to implement.
- **Sustainable fleet strategy and shifting delivery expectations: Monica Guise, Head of Sustainable Logistics, University of Birmingham**
University of Birmingham will share its strategy behind procuring one of the most sustainable fleets in the country. A government Go Ultra Low champion, the university is also working to change the culture behind delivery expectations at its town-sized, urban campus network.
- **Waste into energy for electric-powered RCV and alternative fuel trials: Gary Clark, UK Fleet Director, Veolia**
Major waste and recycling firm Veolia has been successfully trialling and switching its fleet to alternative fuels. Its most recent Innovate-UK supported project will see non-recyclable waste converted into energy to power an electric RCV.
- **Urban trailer innovation at the retailer's Oxford Street store: Ben Farrell, Head of Central Operations and Transport, John Lewis & Partners**
A look at a new initiative being trialled at JLP's flagship Oxford Street store to reduce road mileage and emissions, which will be rolled out nationally if successful.
- **Q&A**

13:00 – 14:15 Coffee, Networking and Knowledge Zone

SESSION THREE

14:15 – 15:45 SESSION THREE: PLANNING AHEAD

Collaboration, planning and infrastructure are key ingredients to improving freight flows into urban areas.

- **Vision for future freight in the capital: Alex Williams, Director of City Planning, Transport for London**
- **The shape of urban warehousing requirements: Kevin Mofid, Director of Research, Savills**
Savills takes a look at the urban warehousing trends of the future with the example of an exciting, speculative, multi-storey microhub being developed by property developer Gazeley for last-mile distribution operations.
- **Gas potential for city fleets: Mark Gilks, Transport Sales Manager, Calor**
From range extenders for city deliveries, dual fuel for existing fleets, bioLPG giving even greater emission savings, right through to LNG for those serving the cities from a distance, Calor will demonstrate how one size doesn't fit all and how gas is already part of the bigger picture.
- **All-electric micro distribution in the heart of London: Rob Fowler, General Manager – CSR & Technical Planning, DPD Group UK**
A look at a new all-electric smart urban delivery depot in the heart of London facilitating emission-free final mile parcel delivery. Exploring the barriers overcome and the challenges faced in a changing city environment.
- **Smart Electric Urban Logistics: Tanja Dalle-Muenchmeyer, Programme Manager Electric Freight, Cross River Partnership**
Exploring smart charging technology for electric freight vehicles, the Smart Electric Urban Logistics project is led by UPS with project partners Cross River Partnership and UK Power Networks.
- **Q&A**

15:45 – 17:00 Coffee and Networking

17:00 Expo Closes

Truck Door Windows

Helping reduce accidents!

This driver saw her!.....

A

AirQualityNews.com

Stand no: S39

Tel: 0207 633 4521

Email: Geraldine.c@airqualitynews.com

Web: www.airqualitynews.com

AirQualityNews.com is the only dedicated daily news service offering information, analysis & perspectives on air quality issues for the sector's professionals and suppliers in the UK. Attracting around 20,000 visitors every month, including local authorities, fleet managers, consultants & academics, AirQualityNews.com is a vital source of information on all issues related to air pollution and emissions.

AirQualityNews.com is an influential source within industry & local government. Launched in 2012 by Environment Media Group, a trusted authority on environmental matters, the website covers a spectrum of issues shaping the sector ranging from air pollution and quality, policy updates and regulations, through to equipment reports and studies from both the private and public sectors.

Allison Transmission Europe

Stand no: S05

Tel: +44 7557 403524

Email: Nathan.wilson@allisontransmission.com

Web: www.allisontransmission.com/

Allison Transmission is the world's largest manufacturer of commercial-duty automatic transmissions and hybrid propulsion systems. Our products are specified by more than 300 of the world's leading vehicle manufacturers and are used in a range of market sectors—from bus, refuse and emergency to construction, distribution and defence.

We have approximately 1,400 dealer and distributor locations, employ more than 2,700 people around the world and our international presence spans more than 80 countries.

It is with this promise and commitment to; provide the most reliable and valued propulsion solutions in the world to enable our customers to work more efficiently.

Asset Alliance Group

Stand no: S14

Web: www.assetalliancegroup.co.uk

Asset Alliance Group is an award-winning, independent sales and lending provider for fleet assets in the commercial vehicle and transportation sectors. Today we have one of the largest HGV fleets on the UK roads and some of the country's leading fleet logistics operators and bus and coach operators as clients.

Our business offers contract hire, leasing, rental, sales and fleet management services incorporating specialist divisions for trucks, trailers, buses, coaches, temperature-controlled vehicles and traffic management vehicles.

With geographic coverage from 4 sites in Scotland, West Midlands, London and Hampshire, we offer our clients a wide range of flexible and cost-effective services that deliver real value to your business. Our aim is to save your organisation both time and money with a fleet solution personalised to your needs.

Come visit us today or go to www.assetalliancegroup.co.uk to find out how we can help you plan your future fleet requirements and financing needs.

ASSURED project

Stand no: S38

Tel: +32 2 500 56 86

Email: glozzi@polisnetwork.eu

Web: www.assured-project.eu

The ASSURED project aims at boosting the electrification of urban commercial vehicles and their integration with high power fast charging infrastructure. ASSURED will test six public transport buses, two garbage trucks, one delivery truck, and one light commercial delivery vehicle with automatic fast charging solutions. The goal is to charge different vehicles using the same infrastructure.

Polis is a network of European cities and regions working together to develop innovative technologies and policies for local transport. In ASSURED, we represent the voice of local authorities focusing on their strategies and needs for e-vehicles uptake.

Astra Vehicle Technologies

Stand no: S03

Tel: 0151 348 5777

Email: sales@astra-vt.com

Web: www.astra-vt.com

Astra Vehicle Technologies, will be exhibiting the ClearView(TM) range of low level passenger door window products, available for all Euro 6 models of DAF, Iveco, MAN, Scania, Mercedes and Volvo FM/X vehicle brands.

Astra ClearView (TM), provides improved direct vision to the nearside of a vehicle to help protect vulnerable road users via a large area vision panel of toughened & "e" marked automotive glass, which is bonded in place for security.

Uniquely, all Astra ClearView products are designed to allow the main passenger electric window to function normally – fully (100%) opening. Where the OE door is vented to aid demisting, the Astra ClearView solution diverts a portion of the manufacturers' air flow system to aid demisting of the low level window area.

Fitting of Astra ClearView products can be arranged at Astra, or nationwide via an approved mobile fitting service.

ATE UK (Wheel Sentry)

Stand no: S08

Tel: 01206 589557

Email: ross@wheelsentry.com

Web: www.wheelsentry.com

ATE are leaders in the ground breaking wheel safety advancement with the development of Wheel Sentry.

Wheel Sentry is the only combined wheel nut indicator and retainer system in the marketplace and has been well received across a number of industry sectors, including the commercial vehicle industry. Unlike some other products in the market, the Wheel Sentry system requires no special tools to apply and is quick and easy to fit, making checking and maintenance a simple hassle-free operation.

We look forward to meeting you at the Expo where we will display the full range including the latest Wheel Sentry Link Indicator!

THERMO KING

**THE FIRST
LAST MILE
OF A NEW ERA**

**Charge forward
with the all-electric
E-200**

The era of electric refrigeration is here, and the first to embrace it will be the ones who get the most out of it. Enter the all-electric E-200. Fit for small to medium vehicles, it delivers true constant capacity, effortless plug-and-play installation as well as intelligent power management. And – most important of all – it does all that without draining your vehicle battery.

Awarded the industry-leading five-star Direct Vision Standard rating, our Elite 6 chassis sets the DVS benchmark.

A fundamental design ethos behind the Elite has always been that it must integrate safely within the communities in which it operates, allowing the driver to anticipate hazards, obstacles and vulnerable road users in the surrounding environment.

With a large, panoramic windscreen, the Elite 6 has longer windows than most conventional cabs, providing optimum visibility when manoeuvring or turning. A lower driver's seating position also prevents pedestrians or cyclists disappearing from view when in close proximity to the vehicle.

Disc-Lock Europe provides superior vibration-proof fastening systems that are used in a wide variety of industries worldwide, from trucks, trailers and buses, to rail engineering and heavy equipment manufacturing.

Our heavy duty self-locking fasteners prevent loosening caused by vibration and shock in high stress applications, this solves the problem of fastener failure.

The Disc-lock Safety Wheel Nut is a free spinning, vibration and shock-proof wheel nut, specifically designed to eliminate the risk of wheel loss from Commercial Vehicles.

The Disc-Lock Safety Wheel Nut is a

leading solution to lose wheel nuts and wheel detachments throughout the transport industry and has 25 years proven track record worldwide.

Products – The Disc-Lock Safety Wheel Nut, Locking Nuts and Locking Washers.

Web: www.exeros-technologies.com

For over 10 years EXEROS Technologies have been delivering vehicle camera safety solutions across the UK and worldwide, ensuring fleets are protected at all times.

The company's product range include vehicle CCTV systems, telematics, 360 blind spot system and the latest AI-powered transport technology – ADAS (Advanced driver-assistance systems), designed to help prevent accidents by assessing the traffic situation and timely informing the driver.

From becoming the first company to be approved by TFL to fit CCTV systems in London's black cabs to securing partnerships with global leaders – RAC and CEMEX groups, EXEROS are committed to safeguarding transport fleets with an innovative camera technology.

F

FORS Fleet Management System

Stand no: S07

FORS Fleet Management System (FMS), powered by FleetCheck, delivers a comprehensive platform enabling complete vehicle, driver and organisation management.

FORS FMS delivers the tools you need to obtain and maintain your FORS accreditation. Its intuitive design suits fleets of all sizes, providing a robust audit trail and total peace of mind.

FORS FMS delivers:

- Online Fleet Management Software for vehicles, drivers, plant and equipment.
- Scalable and flexible for any size and makeup of fleets.
- Schedule and manage multiple Audits

(Bronze, Silver and Gold) over multiple Operating Centres.

- Manage progression through each Audit
- Integration with providers of licence checking, telematics, fuelcard, leasing and accident data.
- Mobile app for vehicle inspections.
- Policy management and document storage.
- Advanced management reporting.

Whether you're a start-up or a national corporation, FORS FMS will enable your business to handle your fleet tasks efficiently.

Forge

Stand no: S17

www.forge.co.uk

Forge manufactures efficient, future proof and cost effective LED product to your specification and at surprisingly good value. With over 25 years of expertise, profound knowledge and a bunch of charming people we can deliver what contract manufacturers can't.

LED PCB, electronic, thermal and optic design are all part of our key processes to get you what you really want. What's more we'll deliver on time and to your budget.

Working to your specification we can deliver the ideal low energy LED solutions to improve and enhance cab interiors and general illumination – saving money and energy. A fully managed account service also means your time can be saved as we do all the hard work for you from your initial proposal, to production engineering, testing and delivery of your manufactured items.

Fruehauf

Stand no: V55

Fruehauf leads the way in Semi-trailer and rigid tipping body construction. Working closely with Multinationals within the construction and Highway sector, we are proud to present the Fruehauf Conveyor System.

Available in both Trailer and Rigid models, it is fully insulated, and constructed from Hardox Steel for longevity.

The system is fast and smooth in operation, remotely controlled by either the driver or a banksman and as there is no

tipping required, the Health and Safety risk levels are greatly reduced.

Low level maintenance and unsurpassed payloads add to the benefits of our innovative design.

FTA

Stand no: S10

Web: www.spillard.com

Spillard Safety Systems proactively promotes the awareness of the dangers faced by drivers, other road users, pedestrians and site workers due to restricted visibility from the driving position of all types of vehicle and mobile plant. Through practical safety days attendees from experienced operators through to young school children are educated of these dangers by the mapping out of driver blind spots around a vehicle. An industry leader in innovative design and manufacture of safety solutions, Spillard pride themselves in customer service employing a strong team of internal engineers to both carry out quality assured installations and provide first time fix after service.

Stoneridge

Stand no:

S15

Stoneridge is an independent designer and manufacturer of highly engineered electrical and electronic components, modules and systems for the automotive, medium and heavy-duty truck, agricultural and off-road vehicle markets. Offering a full range of products and solutions that are developed and manufactured for trucks, buses, off-road and tier two suppliers in the global vehicle market. Providing instrumentation clusters with displays, Digital Tachographs, telematic systems, camera systems and ECUs.

Sunamp Automotive

Stand no:

V29

Sunamp Automotive

Refrigerated electric vans and trucks have struggled to meet the duty cycle and payload requirements for chilled goods delivery, due to insufficient range and the gross weight of the vehicles. The fridge unit draws power from the traction batteries sacrificing payload for a bigger battery pack or reducing the vehicle's range to a point where it becomes operationally unviable. By introducing Sunamp cold and heat batteries we aim to decouple the power requirements of the fridge unit and cabin heating from the drive train extending the vehicle operational range. Our product development partners are Paneltex, Route Monkey and LowCVP.

Trakm8 offers a broad range of solutions proven to help fleets to increase safety and efficiency, while also cutting costs and carbon emissions. Trakm8's modular approach enables customers to build

tailored, integrated fleet management solutions including telematics, route optimisation, driver behaviour analytics, electric vehicle optimisation, and dash cam and multi-cam systems - including 4G telematics cameras. Through CANbus connectivity, Trakm8 is also an acknowledged leader in vehicle and battery health alerts. Trakm8 easily integrates with third party hardware and software such as back office systems and PDAs, as well as trusted partners such as tachograph analysis specialist, TruTac.

Transdek

Stand no: **V09**

Tel: 01302 752276
Email: info@transdek.com
Web: www.transdek.com

Transdek will be exhibiting its low-height urban double deck trailer built for John Lewis, which carries up to 100% more load than a conventional 18 or 26-tonne rigid. The 10.6m, ambient trailer replaces 2 x rigid vehicles from the retailers fleet and services their Flagship Oxford Street Store (London), removing over 800 journeys per year and generating significant cost savings. With a tight turning circle and improved maneuverability compared to most rigids, the trailer is able to access even the tightest of city centre stores.

The trailer incorporates Transdek's innovative Twin Slide rear doors and new taillift design both of which offer enhanced safety features for both drivers and pedestrians.

Truck Align London

Stand no: **S32**

Tel: 01322 223638
Email: tony.rodwell@truck-door-windows.com
Web: www.truck-door-windows.com

Truck Door Windows are designed/ manufactured utilizing more than 40 years' experience in the repair of major accident damage to trucks and buses. They are constructed using a single glazed type approved glass bonded into the door to retain structural integrity to prevent condensation and make cleaning easy. Truck Door Windows install on all makes/ models of truck. An option is available to lower passenger cab window without window mechanism being visible through

them. More than 80% of cycling fatalities happen when the cyclist is to the front left of the lorry where it's difficult for the driver to see them. It is obvious, therefore, a clear vision panel in the passenger door is the answer to help reduce fatalities/accidents.

CALOR

Econic. Visibly safer.

With its deep panoramic windscreen and low driving position, the Econic brings a new standard of safety to the city. Direct eye contact with pedestrians and cyclists on the street and at busy junctions means it's already improving safety in busy urban environments.

The Econic is adaptable, versatile and built for the city, whatever your urban task. Distribution - delivered, waste disposal - sorted, construction - cemented.
