

Solent Sustainable Distribution Centre

Introducing a smarter way for
businesses to receive deliveries

By Gary Whittle
Commercial Director
Meachers Global Logistics

Funded by the
department for Transport.

Freight in the City-
Edgbaston Stadium
Birmingham. 01.03.2017

What is a Sustainable Distribution Centre?

- Groups individual consignments or part-loads destined for the same locality to reduce vehicle movements
- Widely applied within modern supply chains- NDC & RDC
- Part of an overall strategy to reduce city congestion and pollution.

How do you make an SDC financial viable?

Freight Consolidation:

- Inbound Shipments
- Outbound Groupage
- Scheduled Collections/Deliveries
- Last mile Logistics/ Pre Solent Logistics

How do you make an SDC financial viable?

Storage Requirements:

- Short/ Medium/ Long Term
- Rework/ Out of Gauge/ Inventory Management
- Shared user/Multi Functional

Why would people use the Solent SDC?

- Freight Consolidation
- Storage
- Rework
- Public Sector Integration

Other Benefits

- Reliable, controllable, direct scalable deliveries
- Increased sales/office space
- Increased ability to benefit from bulk buying
- Improved use of staff time/reduced staff cost
- Collection of returns and transfers + waste management
- Avoids congestion at delivery places
- Reduce delivery cost through cutting out last mile

Other Benefits

- Fuel saving
- Opportunity for night time delivery
- Less delays through convenient times of travel
- Reduced wear and tear on vehicles and roads
- Less city wide Congestion
- Less city wide Pollution
- Just in time delivery options.
- Better inventory management.
- Alternative pick up points
- Better Security.

Thank you for your time
