Tool Calibration

Tyre Service Products

Connecting tyres and wheels for smarter working

RL Automotive has been supplying the tyre industry for over 25 years

From tyre consumables to tools & equipment, we have strived to offer a premium service to all of our customers' needs.

We offer next working day delivery on all of our tyre service products as well as bulk discounts, special offers, introductory prices on new brands and tools as well as tailored pricing structures for larger users.

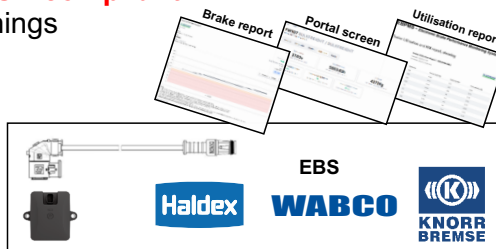

We offer tool calibrations on a wide array of tools from torque wrenches and inflation gauges to jacks and axle stands as well as an out-of-house air tool repairs service. We also offer truck wheel alignment with AutoAlign.

On the technologies side, we can offer hardware and access to our online platform developed to monitor truck tyre pressures (TPMS) in real time with data analytics and recently introduced brake performance monitoring (EBPMS).

EBPMS Brake Performance Reporting

Features

- Daily brake reports ***DVSA compliant**
- Brake performance values ***DVSA compliant**
- Brake warnings for pads and linings
- Real time axle loads
- Trailer utilisation reporting
- Trailer speeds in real time
- Trailer location in real time
- Trailer trip history
- Trailer distances travelled

Plug and play hardware (black box plus cable)

Benefits

EBPMS from RL Automotive is a partnership between RL Automotive and ZF Group for brake performance analytics:

- Easy to install, comprising a black box and cable to the EBPMS system on the trailer
- DVSA compliant solution
- Easy to access and schedule reports
- Additional benefits over and above brake performance, including trailer utilisation, KM travelled, trailer location
- Seamless integration with RL Automotive's award winning tyre, wheel, brake and general maintenance platform for commercial fleets
- Easy to defleet and re-install on new trailers

Cost savings and safety for fleets

- Electronic daily brake performance reporting without the need for a fully laden brake test - replaces 3 out of 4 required yearly laden brake roller tests
- Trailer utilisation reports for efficient logistics management
- Alerting for other braking issues such as pads and linings

Platform Services

IoT solutions that manage Connected Vehicles for fleet customers for predictive and preventative maintenance

Our Connected Vehicle Platform (CVP) offers market leading analytics and measurement solutions to Fleet Operators with a front-end dashboard and a suite of reports and alerts.

AI driven Intelligent Mobility

Web-enabled TPMS with

A fleet TPMS solution to work everywhere through the union of continuous tyre monitoring, formula 1 style telematics and powerful artificial intelligence. Providing constant and real-time visibility of the precise condition of every tyre across your fleet seamlessly.

With the power to detect any problems from the very start before the issue can build. Enabling timely and safe maintenance or repair – minimising risk, downtime and cost.

Alignwatch is the specialist division of RL Automotive - dedicated to on-site wheel alignment for every commercial vehicle.

Our skilled Technicians use leading-edge Josam technology to realign your wheels to the manufacturer's factory specifications

Our technicians use the sophisticated Josam cam-aligner system – approved by Scania, Mercedes, MAN and Volvo/Renault. This camera based technology delivers highly accurate measurements for wheel angles like toe, camber, out of square and axle offset. AlignWatch can correct these to the factory specification or alternatively report them to your service team. All designed to optimise rolling resistance, reduce risk, minimise fuel consumption and carbon emissions

Calibration Service

Calibration of equipment is important to ensure that your devices are displaying accurate results. Measurement equipment tends to be used heavily so regular calibration can detect when settings are getting close to tolerance.

At RL Automotive, we can adjust most torque and measurement equipment for maximum accuracy whilst providing before and after results.

Off Site Service

Most of our customers tend to use our calibration services off site. We will arrange collection of your devices and calibrate them here, at our head office in Didcot. The price of calibration includes the courier costs back to you so there's no hidden costs or unexpected carriage to pay. Turnaround is usually just a couple of days so you can get on as quickly as possible.

On Site Service

Should you wish us to come to you to calibrate your tools, simply give us a call to discuss - we are happy to help.

- ISO 9001 approved calibration certificates, sent as a hard copy or stored on our secure server.
- All equipment used is traceable to a UKAS laboratory and/or to the national standards held by the national physics laboratory
- Minor adjustments & repairs
- Calibration date sticker
- Cleaning and lubrication where required
- If repairs can be carried out, an estimate will be provided before any work is carried out
- Standard turnaround time of 2-3 days

Give us a call on 01235 818 777 to arrange calibration of your tools today!

Tyre Service Products

Regular access to
the best deals
in the industry

www.rlauto.com

Customers of **RL AUTOMOTIVE** have always enjoyed the best offers in the industry through regular contact from our sales department and as a result of our direct marketing campaign which we run every month to our regular customer base.

We construct individual offers that dovetail with our long term pricing and product supply strategy. We understand that although our pricing is ultra competitive you are still on the look out for the best deal possible, so that's what we give you.

Anyone who wishes to take advantage of the offers we have planned for this year needs to contact our sales team on 01235 818 777 so that we can add you to our mailing list. Alternatively, you can email sales@rlauto.com

We commit to...

- Overnight delivery - 24hr/48hr
- Quality products from leading manufacturers
- Ultra competitive prices
- Choice of payment - credit/debit card or on account
- Volume discounts for large users
- Special contract terms
- Free delivery on all orders over £75

...saving **YOU** money!
