

Brigade

Revolutionise Fleet Safety with **Brigade Video Telematics**

Smart. Simple. Reliable.

Your Eyes on the Road – Even When You’re Not There

Brigade's advanced Video Telematics Solution brings together cutting-edge AI, cloud-based convenience, and driver-centric tools to help you monitor, protect, and improve fleet performance in real time.

AI Auto Downloads

Automatically captures video or image snapshots during critical events like:

- Collision Detection
- Mobile Phone Usage
- Driver Distraction
- Fatigue Warning
- Seat Belt Non-Usage

Web-Based Interface

No installations needed. Access everything through a secure, browser-based platform – anytime, anywhere.

Dedicated Mobile App

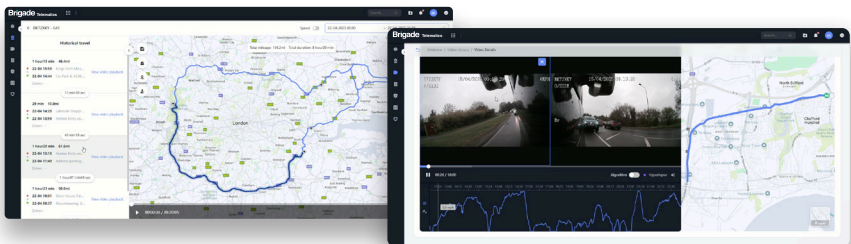

Stay connected on the go with full support for iOS and Android devices.

Hyperlapse Feature

Automatically captures a snapshot every 5 minutes, giving you a time-lapse view of the journey for fast reviews.

Simple, Intuitive Interface

Designed for ease-of-use, so your team can access critical data and perform key actions without training delays.

Empowering Safer Driving and Smarter Decisions

Brigade Video Telematics isn't just about recording — it's about transforming how your fleet operates.

Key Benefits:

Proactive Driver Coaching

Use real video evidence to identify unsafe behaviors and deliver targeted coaching — before accidents happen.

Accelerated Investigations

Video footage provides undeniable context for incidents. Quickly resolve insurance claims and internal reviews with visual proof at your fingertips.

Enhanced Compliance and Safety Culture

Support a safer fleet by reinforcing seatbelt usage, reducing phone distractions, and fighting fatigue with real-time alerts and feedback.

Cloud-Based Convenience

Access all data securely without complex installations. Manage your fleet from the office, at home, or in the field.
