

Specialist advisors to the energy sector

We are proud to sponsor the 2021 SHFCA conference and have particular expertise supporting a number of significant hydrogen projects including:

- Advising developers and supply chain clients in relation to fuel, gas and electricity supply agreements.
- Advising in relation to private wire agreements and power purchase agreements.
- Advising wind and solar operators and investors in relation to constrained wind energy projects and possible lease arrangements relating to hydrogen production and offtake.
- Advising an electrolyser manufacturer on contractual matters.

Energy Sector expertise

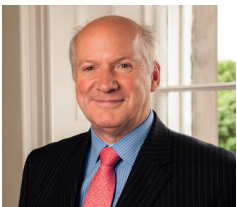

Our energy team has coordinated legal services on over 250 energy projects and transactions in the past 12 months with a global development value of over £6bn. These include onshore and offshore renewable and conventional energy developments, including decommissioning, repowering and

refinancing, structuring of development vehicles, complex mixed strategic land and energy development projects, through to storage, utility infrastructure and network connections.

Our expertise includes:

- Onshore renewables – wind; hydro; solar; storage; AD; hydrogen; biomass;
- Offshore renewables - wind and marine;
- Utility Infrastructure projects and reinforcement;
- Repowering & extensions;
- M&A portfolios and DD projects;
- Multi source energy projects;
- PPAs and related contracts;
- Islands & Communities;
- Renewables and Oil & Gas supply chain & decommissioning;
- Banking & Finance;
- Strategic land involving energy mix
