HOW TO LINK WITH
THE CINEMA SOCIETY

The Cinema Society's value lies in its tightly controlled membership accessible only through our clients, emphasising the need to keep access **secure and exclusive**. See below for our secure access options.

Access by Email Suffix

- We make sure that only those with a certain email suffix (e.g. @yourcompanyname.com) can access the site.
- This is great for SME's and larger organisations, making The Cinema Society available to employees.

Access Codes

- We provide you with unique access codes, (one per user) to input on registration.
- Ideal for SME's and larger organisations who have multiple email suffixes within the audience.

Known Source URL

- We provide you with a single URL which allows click through to join (we check which URL the new member has come from to confirm valid).
- This is great for benefit agencies, SME's or larger organisations who require single click access from their own platform.
- However, there are slight security concerns over this route and we may ask you to change the URL at short notice on occasion.

Time Limited URL API

- This is an API that generates a single use joining URL, which is time limited with each click.
- Ideal for benefit agencies or larger organisations who require single click access from their own platform.

Single Sign on

- This is an API instruction that allows members of other closed user groups to access The Cinema Society without registration or sign in.
- Also great for benefit agencies or larger organisations who require single click access from their own platform.
- However, this does take a little more time to set up, clients using this service will be subject to additional fees.

Stock API

- This allows clients to pull vouchers directly from our stock as and when required.
- Perfect for benefit agencies or larger organisations who host their own e-commerce platform.
- Clients however, will need their own e-commerce platform set up for its members, fees may apply.
