

# Premium probiotic formulations

Winclove researches, develops, and produces impactful probiotic formulations with the aim of improving quality of life. In close collaboration with leading academia worldwide, we develop high-quality indication-specific probiotics, distributed under private label by our trusted business partners.

## Quality

Driven by our scientific core values and dedication to excellence, we continually advance our state-of-the-art facilities and processes and we go beyond quality requirements to set new industry standards.

## Effectiveness

We deeply characterize our bacterial strains to create thoughtful, multispecies formulations. They are scientifically proven effective through clinical and user-centred research.

## Partnership

We stand for passionate partner support, tailored to what our partners truly need to succeed during product launch and beyond.
