

# Is an out-of-the-box cloud solution really right for your business?

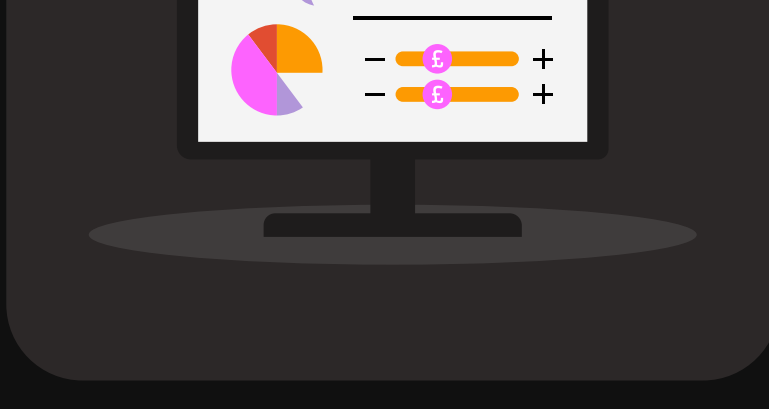

Does this sound like you?

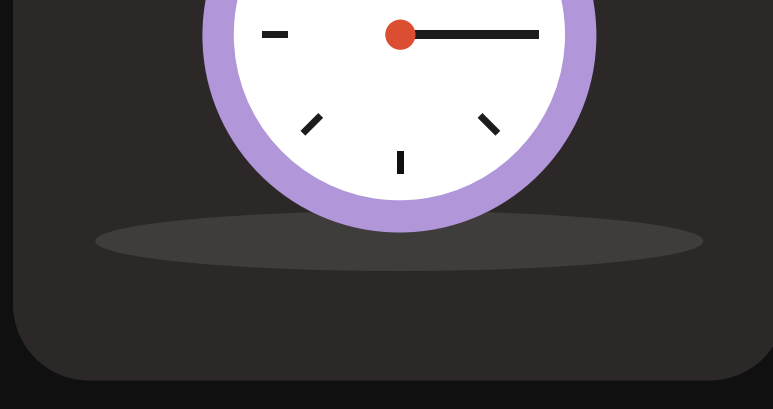

I need a tailored solution for my business

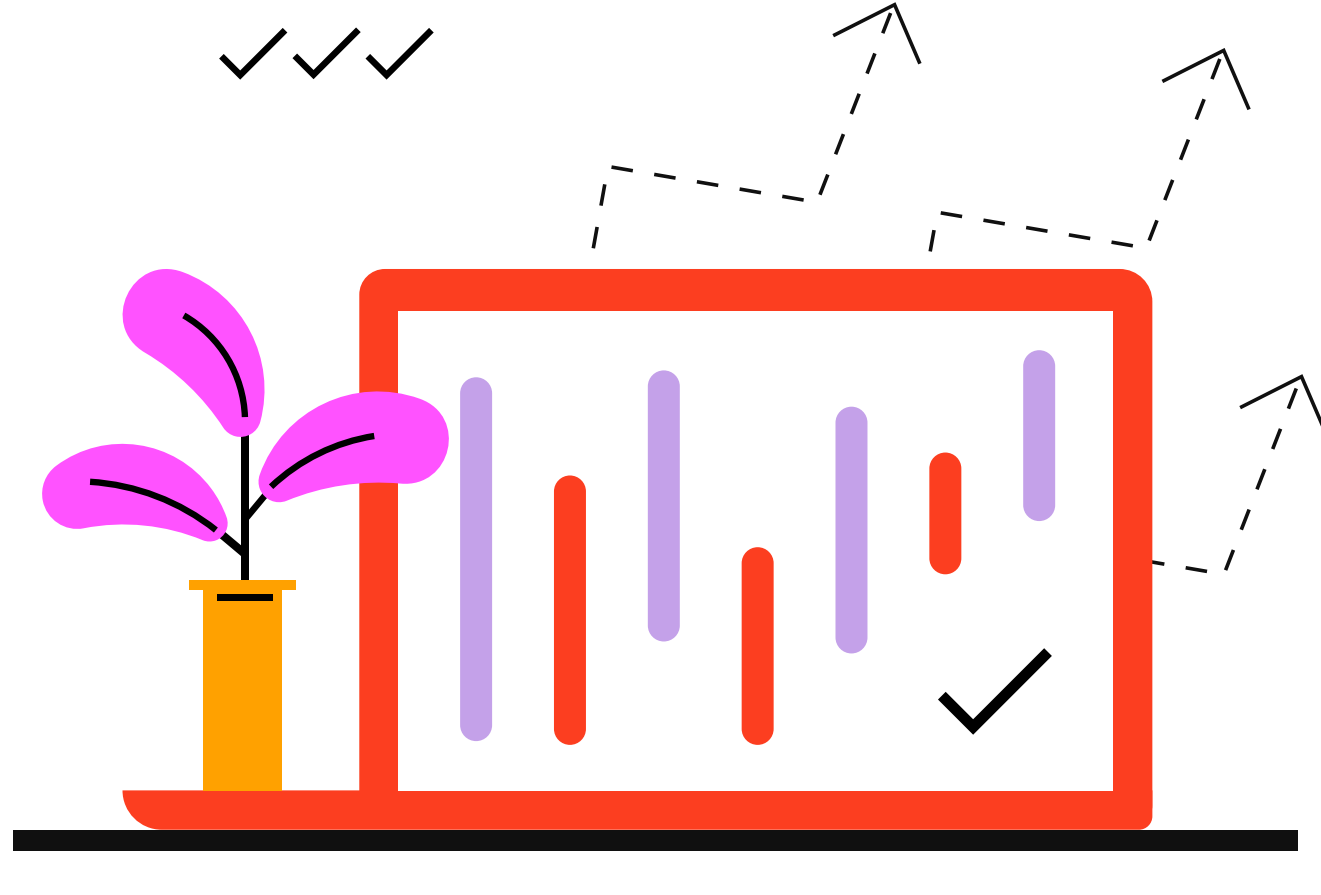

I need to control costs, no surprises

I need a Cloud MSP I can trust

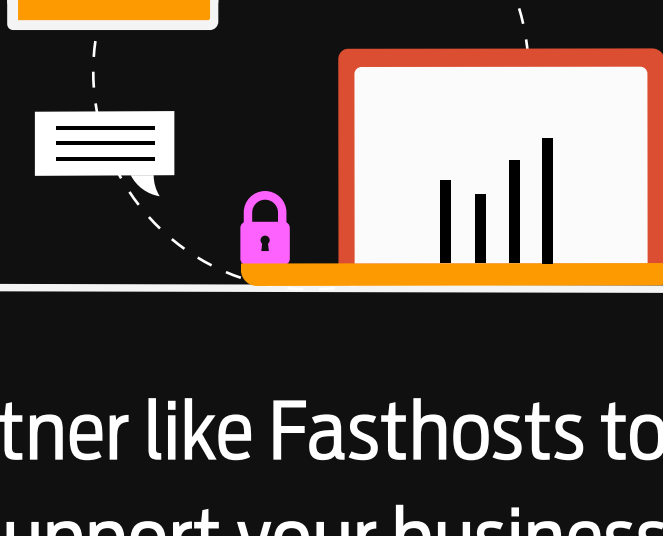

I need a solution that saves me time

If you're in the cloud already or making the move you'll need to consider these points:

## Are you doing too much?

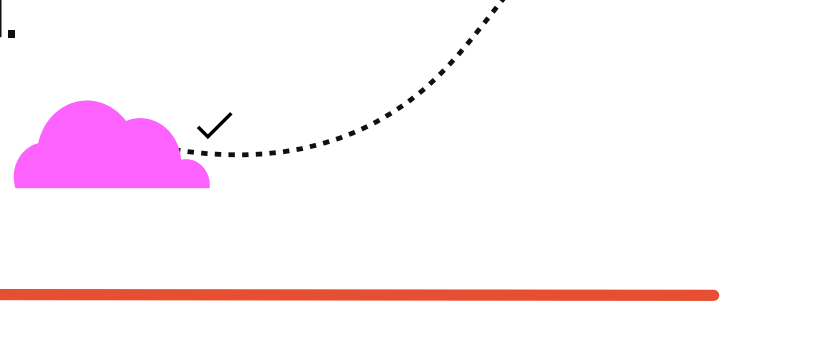

Knowing what—and when—to outsource can help you get the best from your resources.

Use a trusted expert partner like Fasthosts to define exactly what cloud support your business needs and whether keeping services in-house actually has hidden costs.

## Is your cloud solution optimised?

A bespoke solution, designed by experts to fit your specific needs, is efficient and effective. This is the key difference between managed and unmanaged cloud.

Assembling your cloud solution in-house, using components offered by a cloud hyperscaler, could be a false economy, including options you don't need but are still paying for. Fasthosts ProActive solutions are designed with you, and managed for you.

## How safe is your data?

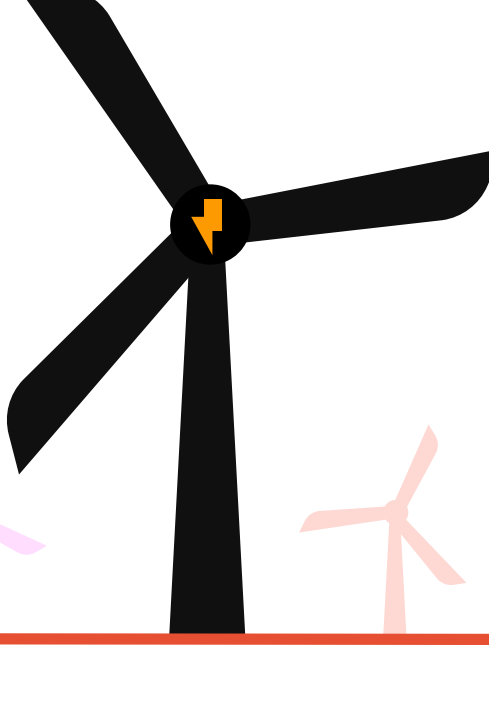

Make sure your cloud host adheres to rigorous privacy and security standards.

Hosted in Europe and 100% compliant with GDPR, using our data centres means you're always in control of who can handle and access your precious data.

## What are the environmental costs of your IT?

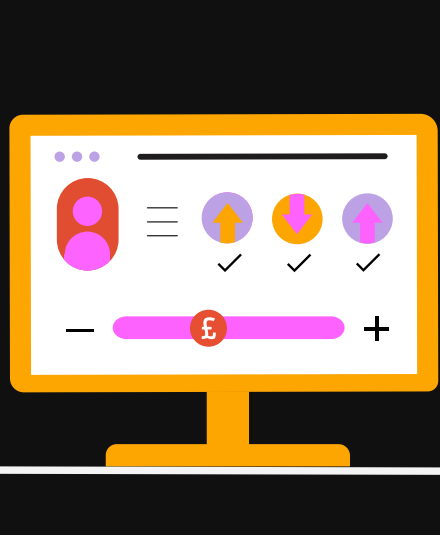

Eco-friendly infrastructure will help you meet your sustainability targets.

The UK data centres that Fasthosts uses for its ProActive managed cloud services are powered with 100% renewable energy. Now you can have green IT and excellent service.

## How easy is it to switch to a different solution?

Easy! With full transparency and predictable, scalable spending you'll only pay for what you use. No surprises.

Fasthosts ProActive managed cloud services have a transparent, usage-based pricing model. You only pay for what you use.

## What happens when you need to scale your cloud solution?

Also easy. We have a whole team of experts ready to help you scale as and when you need to. No hoops to jump through.

For expert 24/7 support, Fasthosts ProActive managed cloud services take the pressure off your internal team. We ensure your uptime, so you can focus on your business.

Chat with our experts, real people - no bots.
