Cloud Accelerator Programme

3Gi Technology have a rich history in helping business leverage AWS to make the right choices in thier Technology Strategy. We also have our own Cyber Management SaaS start-up developed on AWS, so understand the challenges! Leveraging AWS's Fast Start support funds, we have created a bespoke offering to act as your trusted tech advisors, solution architects and accelerate your product specific tech stack build, or migration from on prem / other providers.

What are the costs? Nothing! This engagement is completely cost neutral, for any clients that project to spend more than $750 per month on the AWS Platform We are able to provide these services as an accredited 'JumpStart' partner, and leverage the funding available to invest 3 Days consulting and Solution Architect time to deliver the program.

1. DISCOVERY

1 hour

We will understand your product, technical capabilities internally and your vision for deployment and scaling

2. CONSULTANCY

1 hour

Building on the discovery, we work with you to consult on the technology stack, product fit and agree a target operating model.

3. BEST PRACTICES

2 hours

We will help implement a minimum level of best practices around security, billing and recovery. We use our own templates and automation to streamline this

4. IMMERSION

4 hours

We will run a targeted immersion ½ day for your internal team on the relevant technology. This will give context and run hands on labs to upskill for your own agility

5. POC DELIVERY

1 Day

From the product consulting session, we will agree a suitable POC or MVP delivery in your AWS account, and work with you to deliver the solution against the scope

6. WAFR

1 Day

Once the POC is running, we will complete the Well Architected Framework Review process with you, to build in best practices and management over your tech stack
