

# AC-44

With a compact footprint, the AC-44 is an ideal solution for any limited space application that requires high-quality sound capture, including telemedicine, UCC workspaces, call centers, and more. The MXL AC-44 has won many prestigious industry awards, taking home Best of Show honors in the new audio conferencing product category at major trade shows like ISE and InfoComm.

## Features

- Three capsules designed for a wide pickup arc with high voice intelligibility with sound rejection from the back
- Easy plug-and-play connectivity for use with Mac and PC computers
- Available in white, black, and cobalt
- Ideal for telecommunication
- Professional low profile design with durable all metal construction
