

# UC MICROPHONES

MXL Microphones offers many solutions for corporate communication settings, harnessing the same advanced internal components used in professional studio recording microphones, to make great sounding products that work seamlessly with soft codec communication systems like Skype, Google Hangouts, Zoom, and more.

## MEETING ROOMS

### MXL® AC-360

#### 360° USB Conferencing Microphone

The MXL AC-360-Z is a USB-powered conference microphone that captures crystal clear audio in a full 360° within a 25-foot radius. The AC-360-Z is compatible with any Mac or PC device through simple plug-and-play connectivity without needing to download any drivers.

- » Twelve-capsule design for 25-ft. audio pickup range in 360° arc
- » USB-C, 3.0, and 2.0 power and signal
- » Multiple AC-360-Zs can be linked together to cover large areas
- » Durable metal finish with low-profile design

## HUDDLE ROOMS

### MXL® AC-404

#### 180° USB Conferencing Microphone

The MXL AC-404 captures crystal clear speech intelligibility with easy plug-and-play USB connectivity. Three microphone capsules in a surface-mount boundary design delivers an amazing 180 degree pickup pattern with a 25' range making it ideal for podiums, conference rooms, courtrooms and connected classrooms.

- » Three-capsule design for 25-ft. audio pickup range in 180° arc
- » Easy USB 2.0 plug-and-play compatibility with any Mac or PC
- » Durable metal finish with low-profile design

## TELEMEDICINE

### MXL® AC-44

#### Miniature Conferencing Microphone

The MXL AC-44 packs professional conferencing microphone technology into a miniature form factor for applications where physical size is of utmost concern. The AC-44 is compatible with any Mac or PC device through simple plug-and-play connectivity without any additional drivers.

- » Miniature sized for mobile carts, industrial applications, and custom installations
- » USB-C and analog auxillary outputs
- » Durable metal finish with low-profile design
