

WHY VAIONI CLEARVOICE?

Vaioni ClearVoice is the only carrier-grade cloud-based telephony system that offers a plethora of rich unified communication features as standard that is tightly integrated with the best of breed analytics.

WHAT IS VAIONI CLEARVOICE?

ClearVoice is a carrier-grade Unified Communications service which enables organisations to communicate, collaborate and remain productive from wherever they are, using any device. It brings together the best of data and insights through a single pane of glass to power your customers' businesses, offering easy access to hosted voice, call recording, contact centre and compliance functionality through this simple interface.

What's more, ClearVoice provides mobile PBX capabilities which integrate with the hosted voice functionality to increase adoption and ensure usability – all with the same call recording and MiFID II compliance.

Industry leading Service Level Agreements (SLAs) and enterprise-grade infrastructure provide the peace of mind that business critical systems are safe in the cloud."

ClearVoice offers the opportunities to reduce cost and embrace the cloud as a feature-rich, powerful, UC tool that can be used across desktops, laptops and mobile devices.
