

StarLeaf

Portfolio

StarLeaf enables seamless collaboration through intelligently-engineered reliable meeting room systems, superior video conferencing, and secure messaging.

Our complete communication portfolio allows teams to be more productive by enabling simple and seamless global collaboration. Reassuringly reliable, StarLeaf has architected its own global platform to deliver world-class video conferencing with enterprise-grade support.

StarLeaf platform: *secure by design*

Our secure architecture, rigorous control processes, and the ability to effectively manage risk and avoid service outage make StarLeaf video conferencing trustworthy and seamless.

- StarLeaf is ISO 27001 certified which means customers can be absolutely sure they can rely on the service and trust StarLeaf with their data
- Total ownership of our global platform is why we are the only video conferencing service provider to offer a 99.999% uptime SLA
- The StarLeaf platform comprises 15 global points of presence, that encrypt and secure customers' data traffic
- Our data jurisdiction guarantee means customers choose and control the location where their data is processed and stored.

Room systems optimized with StarLeaf hardware

With systems for rooms of all sizes and a simple-to-use, consistent user experience, StarLeaf makes instant collaboration possible for any meeting space, including:

Huddle rooms

maximize the use of smaller spaces.
Easy to install and provision.

Conference rooms

give you total flexibility, excellent video and audio with a choice of screen support and accessory options.

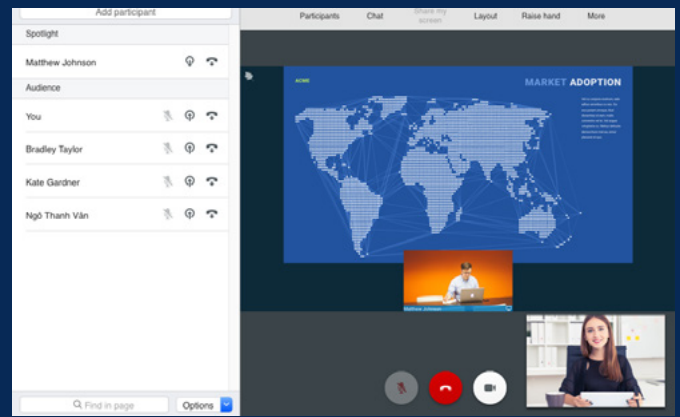

Boardrooms and auditoriums

designed for professional AV integration; makes presenting and collaboration in larger spaces more practical.

Feature-rich meetings experience

The StarLeaf range of meeting services enables superior collaboration with exceptional quality.

- Meet with up to 100 participants in a single meeting
- Slack and Microsoft Teams integrations are available
- Fully-integrated schedulers for Outlook and Google calendars
- Telephone dial-in with more than 50 countries

Total control of your important meetings

- Participant management with add, remove, and mute
- StarLeaf Encore recording captures audio, video and screen sharing

StarLeaf slips seamlessly into existing workflows, meaning teams can remain productive

- StarLeaf meetings require no complex dialing codes
- Join meetings at the push of a button
- Interoperable with all major business video conferencing services
- Participants who don't use StarLeaf can join easily with one touch

Team messaging and collaboration

StarLeaf enables unlimited one-to-one and group messaging, available on all your devices with persistent chat and call history. Features include:

- Enhanced presence to see who is available, offline, in a call, or set as do not disturb
- Send and receive files of all types including videos, images, and documents
- Jump straight from a chat into a voice or video call or meeting.

Automated management and control

StarLeaf meets enterprise requirements for simplicity, control, and security with our suite of automatic centralized management tools:

- Securely manage and provision users via our online hub; the StarLeaf Portal, or through our integrations with industry-leading user provisioning tools such as Microsoft Active Directory and Okta
- Analyze user activity and room utilization to ensure you get the most out of your StarLeaf deployment.
