

# The **Edge Printing** **Leader**

## **Introducing Igel OS Edge Printing for Windows Virtual Desktop, Citrix, and More**

With the integration of ezeep into IGEL OS, secure printing is available for complete Windows desktops accessed on fully secured workstations. Whether via Remote Desktop, Windows Virtual Desktop, Windows 10 desktops via Citrix Workspaces, or VMware Horizon – thanks to ezeep, secure and effortless printing is always guaranteed.

ezeep makes printing so easy by moving the entire printing process into the cloud instead of configuring and running printing at endpoints. Since Igel OS can access printers via Wi-Fi, Ethernet, or USB, no special printers or hardware are required to set up simple, reliable, and secure printing with ezeep.

## Benefit from ezeep Edge Printing:

- ✓ Direct integration into the Igel OS, no software installation necessary
- ✓ No printer drivers required
- ✓ No local print servers to deal with
- ✓ The very best integration with Windows Virtual Desktop and other remote desktop solutions
- ✓ High-performance print output due to optimal compression and streaming
- ✓ Secure printing through full encryption of print jobs
- ✓ Easy control of printer assignments and control of which users are allowed to print where and when

## Test 30 Days for Free

Download ezeep in the Azure Marketplace and get started with high-performing printing. You can test a 30-day, 10-user trial at your organization at no cost without any risk.
