

Simply Focus on Your Network. Leave The Hosting to us.

# Cloud Based Monitoring With PRTG.

# Why a Hosted Monitoring Solution? Why PRTG?

## READY TO USE MONITORING TOOL

A new PRTG Network Monitor instance can be up and running within minutes – there’s no need to order new hardware or find a spare machine. You can **start monitoring from your browser right away**.

## ZERO STRESS THROUGH AUTOMATION

You don’t need to worry about installing updates anymore – we handle that for you. **Paessler will take care of the day-to-day operations**, such as automatic installation of new PRTG versions, and regular backups of your configuration and data.

## SCALE AS YOU GROW, PAY AS YOU GO

Serverless monitoring allows you to get started **without an initial investment** in licenses or in hardware. You can change your plan size up and down, at any time. **PRTG scales with your requirements**.

## MAXIMUM SECURITY FOR YOUR NETWORK

PRTG uses **high-level end-to-end encryption** (TLS 1.2) to protect your data. Our hosting is run on the very reliable Amazon Web Services infrastructure, and constant backups go without saying.

Here are just some of the ways we ensure your data is safe and secure:

- **TLS 1.2 connections** between the Web client, hosted instance, and the remote probe
- Customer configuration and password data are **encrypted multiple times**
- Each hosted instance is an **isolated network**
- Auth0 ensures **state-of-the-art certificate-based signing** for all requests

## How Many Sensors do You Need?

		MOST WANTED		
TRIAL PLAN	PRTG 500	PRTG 1000	PRTG 2500	PRTG 5000
500 Sensors	500 Sensors	1000 Sensors	2500 Sensors	5000 Sensors

“Our infrastructure cannot go down. Period. And if it does go down, it must be detected and resolved immediately. At this point we couldn’t live without PRTG.”

Jonathan Hoppe

Co-Founder, Total Uptime Technologies

“I love PRTG! Couldn’t handle my daily life without. Thanks for a great, always improving product!”

Nicholas Hoague

Co-owner, OnePointSync.

# PRTG Features

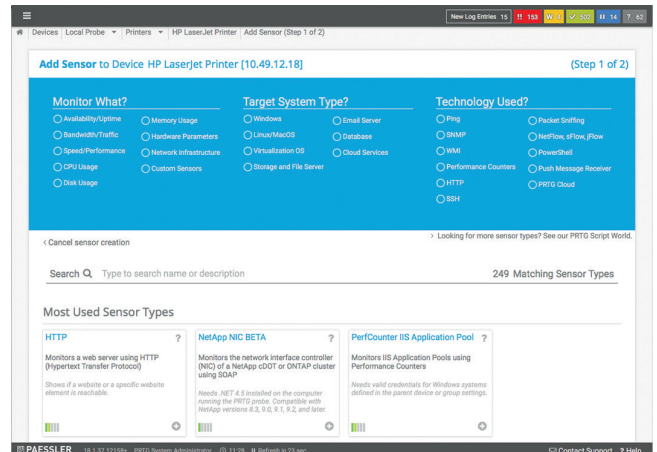

## Integrated Technologies

**PRTG offers hosted monitoring out of the box.**

PRTG monitors traffic, applications, availability, bandwidth and much more.

All important technologies are supported:

- SNMP: ready to use and custom options
- WMI and Windows Performance Counters
- SSH: for Linux/Unix and MacOS systems
- Flows and Packet Sniffing
- HTTP requests
- REST APIs returning XML or JSON
- Ping, SQL and many more

## Maps and Dashboards

**Visualize your network** using real time maps with live status information. Create dashboards with the PRTG map designer and integrate all your network components with more than 300 different map objects - from device and status icons to traffic charts and top lists.

Individualize your map using custom HTML. Share your map providing its unique URL on a dashboard within your company LAN only, or even outside your company.

## Flexible Alerting

**PRTG alerts you** when it discovers warnings or unusual metrics.

PRTG offers many built-in possibilities for notifications, such as email, push, or triggering HTTP requests. With our free apps for Android and iOS you can get push notifications directly to your phone.

Adapt the notification system to suit your needs and schedule alerts (such as 'no low priority alerts at night'), or avoid alarm floods by using dependencies and acknowledging. You can even use our PRTG API to write your own notifications.

"You've made my job so much easier and enjoyable, and I look like an absolute IT ninja when I call senior management to alert them of a problem and they ask, how did you know so fast? Well because of PRTG of course!!"

Michael Barnes

IT Infrastructure Manager, Oasis Financial

"I would just like to say thank you for creating this product. It meets all my monitoring needs and more. I am continually amazed by how much product I get for the price. The software just works! Keep up the good work!"

Evan Mathew

Director of IT, Osoli

## WE ARE PAESSLER

Founded in 1997 in Nuremberg, we are internationally represented in many markets, supporting our partners and customers locally.

With PRTG Network Monitor, we are developing an all-in-one monitoring solution that helps IT professionals monitor their entire infrastructure around the clock.

Over 200,000 IT administrators in more than 170 countries rely on PRTG and gain peace of mind, confidence and convenience.
