AUTOMATION

VISIBILITY

The Rapid7 Insight Platform

Whatever your IT environment looks like today, and however it evolves in the future, you need a security solution that will grow with you. The Rapid7 Insight Platform equips Security, IT, and Development teams with the visibility, analytics, and automation they need to work together—faster and smarter.

Security, IT, and Development teams have the power to:

Quickly replace legacy systems

Insight products are designed to be easy to use and deployed in hours, not months. Skeptical? Try them for free.

Unify data collection

Collect data once from across your IT environment. Regardless of whether your setup is on-prem, hybrid, cloud, or multi-cloud, we give you the tools to collaborate effectively while analyzing shared data.

Scale with ease

Adding more Insight Platform solutions is easy. Once the data collectors are installed, launching new Insight products is just a few clicks away.

Integrate seamlessly

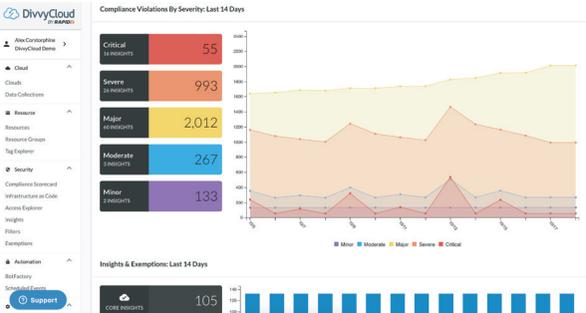

Get faster analysis, prioritization, and remediation with existing tools. The Insight Platform acts as a force multiplier to already-deployed technology.

PROTECT THE CLOUD

InsightCloudSec

Security and Compliance for Cloud Environments

InsightCloudSec empowers you to safely speed up your cloud adoption without compromise. With this fully-integrated cloud-native security platform, you can shift left, reduce noise, and automate tasks for continuous security and compliance, even in multi-cloud environments. InsightCloudSec brings together all your cloud security needs in a single solution, allowing you to innovate in the cloud without risk.

REDUCE RISK

InsightVM

Vulnerability Risk Management

InsightVM gives you clarity into where risk is present across your ecosystem, and visibility into the cross-functional operations needed to prioritize and remediate those vulnerabilities. With this deeper understanding of your risk, you can better inform and align technical teams from prioritization through remediation, and track and see shared progress.

SECURE APPS

InsightAppSec

Web Application Security Testing

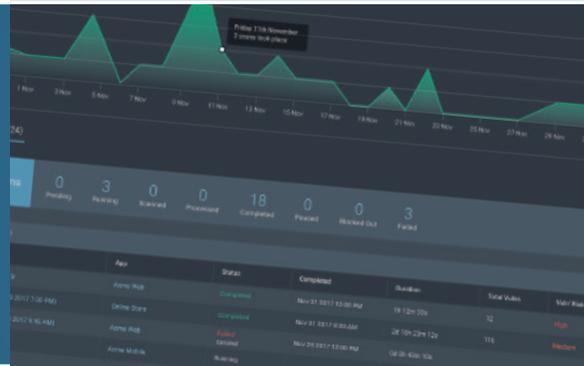

Powered by our industry-leading DAST engine, InsightAppSec was built for modern security and DevOps teams looking to embed security into the SDLC. InsightAppSec bridges vulnerability discovery, attack simulation, and remediation through our unique universal translator, built-in integrations, and attack replay capabilities to provide comprehensive scan coverage and fast time to value—without hindering speed of development.

DETECT ATTACKERS

InsightIDR

Threat Detection and SIEM

InsightIDR cuts through complexity and noise to accelerate detection and response with reliable alerts, high-context investigations, and automation. Powered by insights from our MDR, research, and threat intelligence teams, InsightIDR aggregates and analyzes data sources across logs, users, endpoints, and the network to notify teams at the first signs of attack. With lightweight cloud hosting, InsightIDR avoids many burdens faced by traditional on-premises SIEMs. Customers report the fastest deployment times in the industry, seeing return on investment from day one.

“[InsightIDR] has decreased our average amount of time to investigate and remediate any incident from days[...] to an average time of 22 minutes.”

AUTOMATE ACTIONS

InsightConnect

Security Orchestration and Automation

InsightConnect is a security orchestration and automation solution that enables your team to accelerate and streamline time-intensive processes—no code necessary. With 280+ plugins to connect your tools and easily customizable connect-and-go workflows, you'll free up your team to tackle other challenges, while still leveraging their expertise when it's most critical.

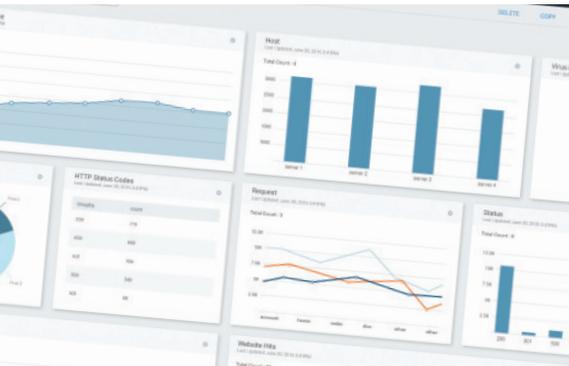

MANAGE LOGS

InsightOps

Log Management

InsightOps collects data from any modern infrastructure source, in any format, enabling you to search and analyze logs using simple keywords or analytic functions. Automatically combine live log and asset data from across your infrastructure into one central and searchable location to access the insight you need, when you need it, for total infrastructure awareness.

“We don’t like to stay with any one vendor with what we do, but when that vendor is continually the best in each category, it’s kind of hard not to go with them.”

Tony Hamil
Cybersecurity Engineer

Whether you're lacking the resources or just the patience, there's no shame in asking for a little help to shore up your security.

Consulting Services

Rapid7 Consulting offers the support and guidance of industry leaders and security specialists to help you accelerate your security improvement via cutting-edge methodologies and risk prioritization.

- Advisory Services
- Penetration Testing Services
- Incident Response Services
- IoT Security Services
- Product Training and Deployment Services

Managed Services

Looking for a managed security partner? Leverage Rapid7's experts, leading technologies, and best practices to do more with less.

- Managed Detection & Response (MDR)
- Managed Vulnerability Management
- Managed Application Security
