

tenfold

Next Generation Access Management

Simple. Secure. Ready to go.

What Is tenfold?

tenfold is the leading user and access management solution for mid-market organizations. The software ensures business users only have access to data they actually need and thereby reduces the risk of data breaches. By automating processes, tenfold helps to save valuable time.

IMPROVED CYBER SECURITY

tenfold ensures that privileges are assigned and revoked automatically and subject to regular reviews, putting an end to risky access structures.

HIGHER EFFICIENCY

Self-service, workflows and automated implementation of processes across systems saves valuable IT resources.

BETTER COMPLIANCE

Change tracking and the integration of data owners into workflows help to achieve compliance with laws and standards, such as the GDPR, ISO 27001 and PCI-DDS.

Simple Yet Powerful Features

IDENTITY & ACCESS MANAGEMENT

Secure and easy management of user accounts and privileges for the entire user lifecycle.

MICROSOFT®, CLOUD & THIRD-PARTY

tenfold is perfectly tailored to Microsoft® environments, including the Microsoft 365® Cloud and systems such as SAP® ERP, IBM Notes® and other business applications.

SELF-SERVICE & WORKFLOWS

Through the intuitive self-service interface, users can request privileges which must then be approved or rejected by data owners.

RECERTIFICATION

Data owners can monitor whether privileges are still needed or not. If not, these privileges can be deleted.

SEAMLESS DOCUMENTATION

Users are given a clear overview of privileges and can see right away who has access to what data.

UPGRADES & EXPANSION

In-house applications can be connected to tenfold using the REST-based Generic Connector.

Why tenfold?

tenfold is best suited to meet the demands of mid-market organizations. The software combines identity and access management functions with features for managing access to unstructured data, such as SharePoint® or file server privileges.

**FAST INTEGRATION,
EASY SETUP**

**PERFECTLY TAILORED TO DEMANDS OF
MID-MARKET ORGANIZATIONS**

**INTUITIVE USER
INTERFACE**

**EXCELLENT INTEGRATION WITH MICROSOFT®
AND THIRD-PARTY SYSTEMS**

**FLEXIBLE
LICENSING**

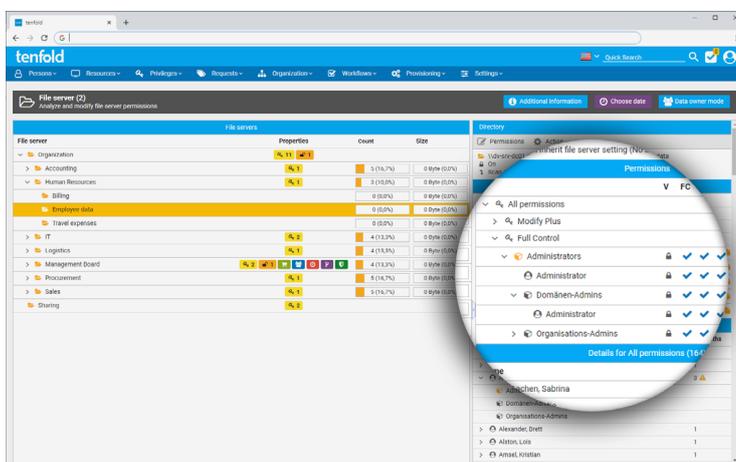

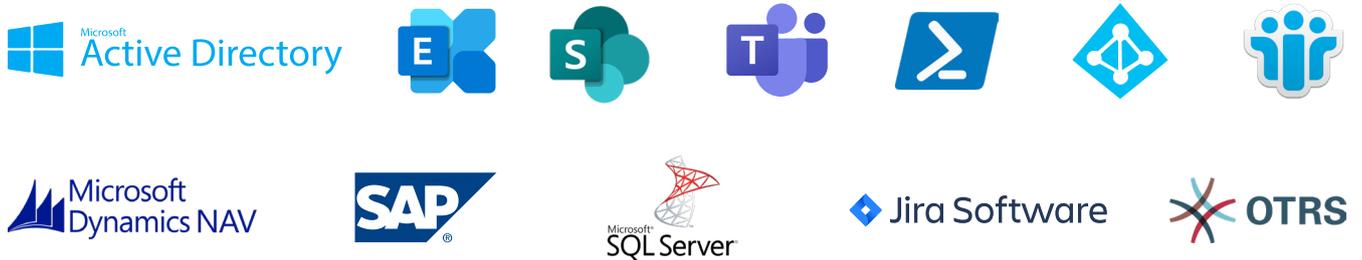

**STRONG OUT-OF-THE-BOX WORKFLOW
FEATURES**

Advantages

THE ORGANIZATION	IT MANAGERS, CIOs, CISOs	ADMINS
Compliance with regulatory standards (GDPR, ISO 27001).	Reduced risk of internal data breaches.	Process automation saves valuable time.
Data owners control and adapt privileges.	Internal and external audits simplified.	Fewer human errors.
Shorter waiting times when processing access requests.	Direct integration of data owners into decision-making processes.	Automatic and seamless documentation.

Connected to Important Systems

Plugins are configured in tenfold's intuitive user interface, which means that no programming knowledge is required to connect tenfold to standard programs – including, but not limited to:

Easy to Use

Usability is one of tenfold's key features. On average, the software is ready for use within 10 days. It makes complex matter coherent and user-friendly. The intuitive user interface allows for easy management of all functions. Privileges on file servers, mailboxes and in the cloud are presented graphically, giving you a direct overview of who has access to what data.
