

# ezeep Hub – The Cloud Bridge for Hybrid & Local Print Infrastructure

Despite ever more services moving to the cloud, printing still takes place on-premises and on the ground. The ezeep Hub was created to leverage the advantages of the cloud for your print infrastructure. A handy device that simply plugs into your network that instantly connects your printers to the ezeep cloud. No moving parts, no local management, just stressfree printing for office and home spaces as well as hybrid environments.

- › Plug and play – no on-site IT expertise needed
- › All ezeep Hubs are centrally manageable via the admin portal
- › Highest print job compression
- › Automatic printer locating
- › Supports mobile and remote session printing
- › Secure, encrypted printing without VPN
- › Continuously identifies to a zero-trust environment
- › Supports up to 4 card readers for secure, pull printing
- › Eliminates print servers, significantly driving down costs
