How did Cybanetix start?

Cybanetix was founded with a view that the Cyber Security industry in the UK was polarised between value-added resellers not adding value and large service integrators offering value at a very high price.

Working with leading technology partners, we can provide our customers with an innovative security ecosystem with natural integrations between all the technologies. These technologies, combined with our next-generation security event monitoring platform, with integrated threat intelligence and breach detection engine, allow us to continuously alert you of any breaches and threats in your infrastructure.

Growth of Cybanetix

+

Top 10 cybersecurity provider 2018 awarded by CIO magazine

Founded in 2017, Cybanetix quickly became a trusted service partner of Exabeam & SentinelOne. Becoming a founding member of Exabeam Emerald Club & Member of SentinelOne Paladins respectively.

Exabeam 2020 & 2021 EMEA MSSP Partner of the Year

Cybanetix was recognised as Exabeam 2020 & 2021 EMEA MSSP Partner of the Year. This reiterates our continued aim that Cybanetix offers our customers an exceptional service along with best of breed technologies.

SentinelOne EMEA 2021 Technical Star Award

In 2021, Cybanetix was also recognised as SentinelOne EMEA 2021 Technical Star. Highlighting our continued aim to maintain the highest level of technical ability to ensure our customers are well protected.

LET'S DIVE IN:

THE CYBANETIX SOC

Cybanetix offers a next-generation SOC experience, leveraging market-leading SIEM and SOAR technologies to provide a 24/7 security monitoring service, with capabilities spanning threat detection, behavioural analytics, detailed investigations, response, and remediation.

- 📍 UK based Security Operations Centre manned with experienced security analysts 24x7.
- 🕒 Guaranteed service levels ensure fast and efficient responses to threats.
- 💻 Experienced security architects, providing a bespoke service for your every need.

Security Operation Centre Services

Technology only

Having won both Exabeam's 2021 EMEA MSSP of the year and SentinelOne's 2021 technical star of the year, we are the safest pair of hands to specify the right technology solutions for our customers, together with full technology deployment, implementation and on-boarding.

Managed SIEM and EDR technologies

A well-deployed security solution, with the right analytics, enables our customers to both identify breaches before and as they happen, as well as remediate any damages it may have caused. Not only will Cybanetix ensure your Gartner leading solution is deployed correctly, we will also expertly maintain and manage it to your every security need.

Outsourced SOC

Our Outsourced SOC service provides a 24x7 security monitoring and incident detection service based on the Gartner leading Exabeam SIEM platform with real-time detection, correlation, alerting, machine learning and User and Entity Behavioural Analytics (UEBA). In addition, Cybanetix provides comprehensive service levels that ensure you a maximum 15 mins response to any threats detected.

Managed Detect and Response - MDR

The MDR service comprise 24x7 security monitoring, incident detection, AV, EDR and remediation service. As part of the service, Cybanetix will fully deploy the Exabeam SIEM and SentinelOne EDR platforms, as well as undertake all tailoring and ongoing changes and modifications to ensure a continued effective monitoring and remediation service.

The Cybanetix SOC technology stack

Named as a Leader for the third year in a row, Exabeam is positioned highest for the ability to execute in the Gartner 2021 Magic Quadrant for SIEM. Validating that traditional security tools can't adapt to the new world of cyber threats.

SentinelOne is a proud Leader in the XDR and endpoint security market. They are recognized for both execution and innovation by authorities such as Gartner, and consistently lead the pack in testing & evaluations conducted by firms such as MITRE Engenuity and SE Labs.

Build automated play books that orchestrate hundreds of the tools you rely on through a simple drag and drop interface. Siemplify automates repetitive tasks to allow our analysts to focus on higher value work and slash response times.

Service Comparisons

	TECH ONLY	MANAGED SIEM	OUTSOURCED SOC	MDR	MEDR
Gartner leading security solution	✓	✓	✓	✓	✓
Expert deployment and ongoing SIEM management	✗	✓	✓	✓	✗
24x7 services with 15 mins response time	✗	✗	✓	✓	✓
Proactive response & remedial Recommendations	✗	✗	✗	✓	✓
Ransomware roll back (windows endpoints only)	✗	✗	✗	✓	✓
SentinelOne Endpoint remediation features	✗	✗	✗	✓	✓

Professional Services

Advisory service

Cybanetix provides the customer with strategic guidance on security, compliance, and infrastructure security. Our advisory services range from day-to-day technical support, through to board-level strategy, reporting and training. Working with organisations we ensure that all aspects of security form part of their overall security posture.

Security audit and Posture checking

Cybanetix provide comprehensive posture checks for organisations which need to identify with posture weaknesses, opportunities for improvement or a validation of improvements that have been undertaken. The Cybanetix Security Assessment Management or CSAM leverages inputs from multiple security frameworks such as NIST, ISO27001, Cyber Essentials and PCI to give a comprehensive posture assessment of an organisation.

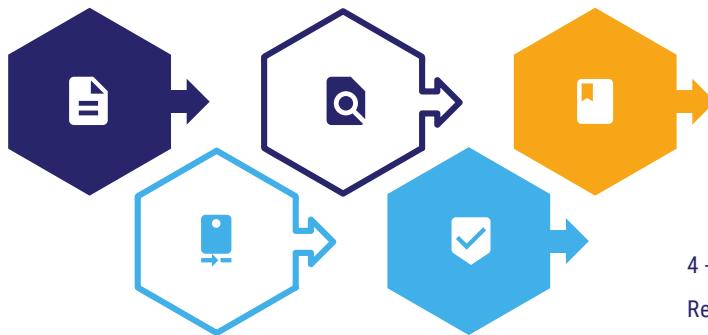

Engineering and project delivery

Security engineers are hard to come by with the significant skill shortage in the UK and the rest of the world. Cybanetix has teams of security engineers which enable customers to resource their security project with experienced security-focused engineers and support throughout the project management process.

CYBER SECURITY ASSESSMENT

1 - The Customer

Cybanetix will agree a desired maturity rating with the customer based on their risk appetite.

2 - The Assessment

Cybanetix assess the maturity of customers cybersecurity practices.

3 - The Recommendations

Cybanetix provide recommendations designed to enhance the overall security posture in line with the risk appetite.

4 - The Report

Recommendation report provides valuable insights to improve customers cybersecurity practises

5 - The Outcome

Customer cyber risk is reduced as a result. The assessment can be delivered as a continuous service to ensure ongoing mitigation of risks and improvement of security posture.

OUR BRAND NEW PARTNER

SONRAI SECURITY

Make your cloud a showcase of exceptional security.
Unearth, prioritize, and remove risks across every
part of your cloud.

Sonrai's cloud security solution unearths, prioritizes, and removes risks across every part of a customer's public cloud. This uniquely enables enterprises to see everything – including inventory, activity, identities, data, and workloads – and to map every possible access path to data in their clouds. By linking workload vulnerabilities into Sonrai's Identity Graph, the most critical risks are rapidly identified, prioritized, and remediated.
