

# WE ARE SIFY

The **IT and Digital Services** company that harnesses **technology** and **people** to achieve **high performance**

# WHO ARE SIFY?

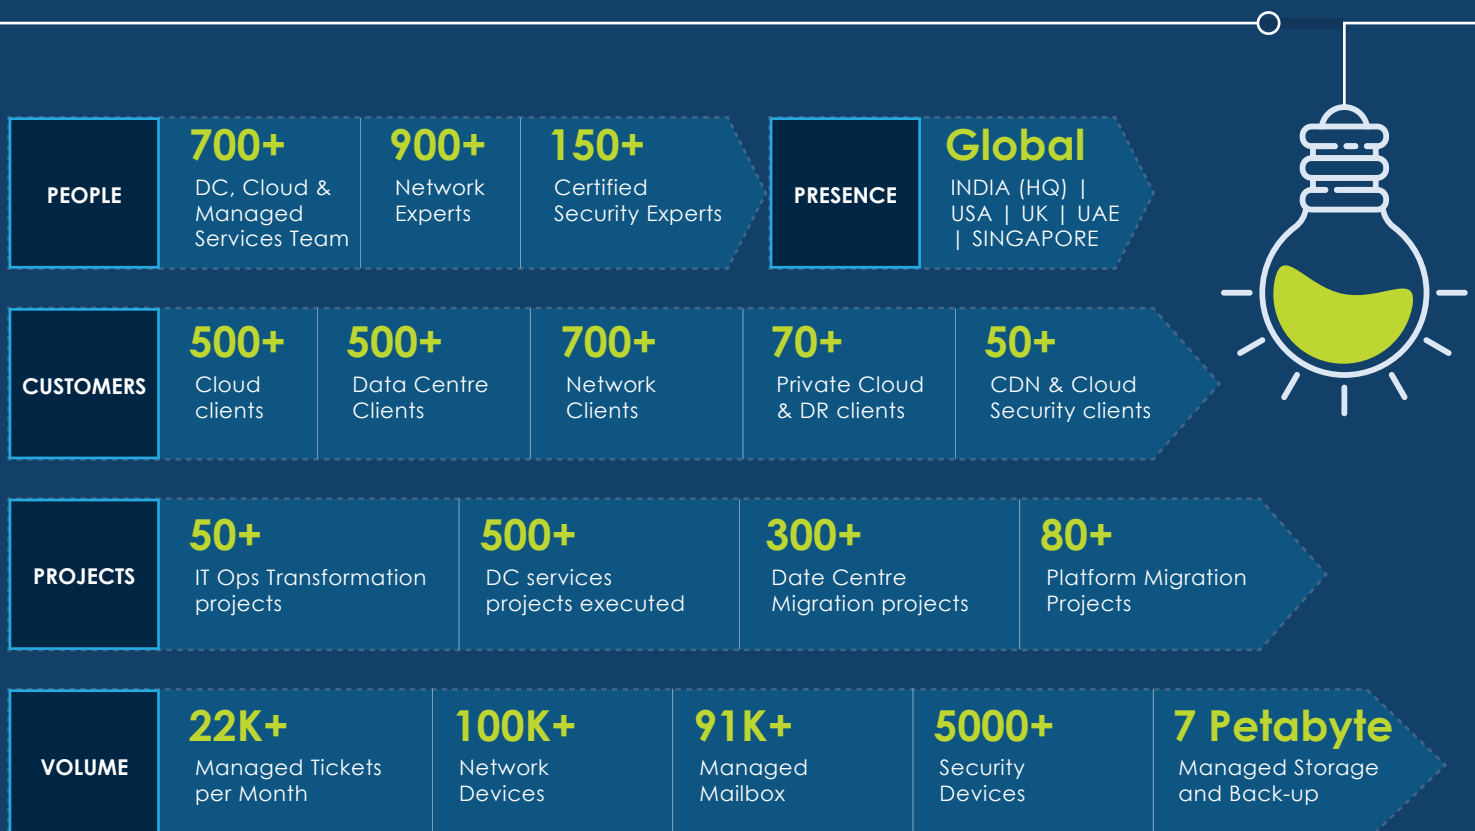

Sify is an IT and Digital Services company that was formed in 1995 and Nasdaq listed since 1999. We help over ten thousand clients and partners improve business operational efficiency and deliver excellence on the Indian subcontinent and globally through network services, data centre services, managed and professional services and digital learning.

Headquartered in India, Sify is widely respected as a Fortune India 500 company. Our European operations were started by offering network and data centre services. Our rapid growth led us to offer digital services including digital learning and cloud professional services.

As a UK company headquartered in India, Sify offers the perfect blend of direct access to resources and infrastructure in India with UK-based expertise and support.

## SIFY SERVICES: KEY FACTS

# OUR SERVICES

## Network

We own and operate one of India's most extensive data networks so we can provide network connectivity, internet services and data centre solutions for your business to build a strong foundation for success in one of the fastest growing economies in the world.

## Enterprise Solutions

We offer professional services and managed services to help your businesses design, plan, migrate, implement and manage cloud infrastructures. Regardless of where you are on your cloud journey, Sify can help.

## Data Centre

Sify will help you build your bespoke service environment in any of our ten data centres across the Indian subcontinent. We remove the challenge and cost of running your own data centre by allowing you to deploy and manage your infrastructure your way.

## Digital Learning

Sify is a specialist digital learning partner that offers the complete learning solution you need to attract, nurture and retain the best business talent. We will help you succeed with your learning goals of boosting employee productivity, reducing staff turnover and developing company culture.

# OUR CLIENTS

Sify works in partnership and collaboration with our customers to understand their goals and work together to achieve them. We know our strengths and what value we can bring so it is our responsibility to ensure our customers do too so they can maximise the outcomes of our partnership.

Our commitment is always to provide excellent service and support but also continuously add value and innovation. That means working in collaboration to get the best results, challenging each other to always do better, having honest conversations and solving problems quickly when things go wrong. To us, that is what a successful partnership is all about.

*"The overall experience with Sify is just great! Sify NOC team, Sify field team, Sify tooling team, Sify sales team, Program Management, Governance layer and Leadership are very helpful, always understand requirements and support in the best possible way."*
