

iomart

Complete Cloud Solutions

# About iomart

## 20:20 Vision

iomart has over 20 years' experience in delivering digital transformation and IT Infrastructure to organisations of all sizes. We help you cut through the confusion to bring clarity to your journey, helping you maximize the cost effectiveness, flexibility and security of the cloud. And we're with you every step of the way – from initial consultancy, through design, build and migration, to providing ongoing managed service with 24/7 technical support.

## Bespoke Solutions Tailored To Your Needs

We've cultivated relationships with key technology partners including AWS, Microsoft and Google Cloud to ensure that we're delivering leading-edge cloud solutions. Our agnostic approach to technology and cloud platforms allows us to provide independent advice, only recommending what's right for your business.

## The UK's Most Accredited Cloud Company

One of the most common cited fears for companies considering outsourcing elements of their IT infrastructure is data integrity and security. As iomart has more accreditations than any other cloud company in the UK, you can be sure your data is in safe hands. Very safe hands. Our dedicated Compliance Team work with you to ensure your data meets most rigorous international data governance and regulatory requirements.

# Global Network and Infrastructure Services

## Global Data Centres

Wherever you do business across the globe, iomart provides the infrastructure to support your international ambitions. We own and operate UK data centres in 8 locations with multiple points of presence globally including North America, Europe, the Middle East and Asia-Pacific, connecting your business to a huge range of Tier 1 networks.

## ServiceLink

iomart has been delivering robust connectivity solutions and a comprehensive range of network services for over 20 years. From fully managed high speed IP-VPN to dedicated Direct Internet Access, Content Delivery Networks, and most recently, private connectivity to over 50 different cloud providers including AWS, Azure and Google.

Our consultants and solution architects will work with you to deliver a high performance network solution covering single to multiple offices, locations and multi-cloud architecture. Available as a fully managed service, providing robust SLA backed connectivity, security and resilience, while you maintain full control and visibility via the iomart control panel.

## UK Fibre Connectivity

We own the most advanced and resilient network in the UK, meaning you get unrivalled performance and security, backed by our industry leading SLAs and 24/7 managed support. We route over 20 Gigabits per second of traffic at peak times and have over 400Gbps of internet capacity available at any time, fully protected by our managed backup or security service.

## Colocation

The cost-effective way to house your server infrastructure within our state of the art data centres. Our robust infrastructure can easily scale to meet demand, providing a reliable service fully supported by our onsite teams. With our high-speed connecting fibre network and uptime guarantee, we offer (and deliver) industry leading SLAs.

## DDoS Protection

Advanced, automated DDoS threat detection and mitigation. We've partnered with Arbor Networks, one of the world's leading providers of DDoS protection technology, to offer cost-effective protection of your networks from attack.

# Digital Transformation

## Strategy Engagement

Our Strategy Engagement service delivers an independent, high-level strategy and roadmap for the customer IT leadership team, including assessment of your current IT environment and business objectives over 3 to 5 years. We create cost models and options as part of the roadmap with a clear indication of ROI and TCO, giving your leadership team complete confidence in our ability to deliver the outcome required, in the timescales needed by your organisation.

## MS Azure Strategy and Design

Our Microsoft accredited team work with you to discover, analyse and transform your existing compute environment and associated applications into a modern cloud platform: be that private, public or a hybrid combination of both. We perform broad analysis of your application estate and provide a road map to achieve desired results.

## Modern Workplace

Give your company the competitive edge by being able to work anywhere, anytime and collaborate from within the office and working remotely. We provide users a feature rich, secure Windows 10 modern desktop experience, utilizing Office 365 with Enterprise Mobility and Security. We ensure users access company resources from devices that meet standards for security and compliance, thereby keeping company data and assets secure from accidental data leaks and cyber-attacks.

# Data Protection

## Cloud Backup

Using enterprise grade platforms, we offer the most robust and secure cloud Backup as a Service for both physical and virtual environments. Application aware agents deployed to each network endpoint (laptop, desktop, server etc.) and backup schedules and configuration managed through iomart's proprietary secure web accessed control panel.

## Cloud Storage and Archiving

Secure and intelligent protection for your valuable data assets. From file sync and share, to unlimited capacity options for large IT estates, we remove the burden and expense of on-site storage solutions. With military grade encryption and multi-site, multi-user options, we deliver the most scalable, flexible and secure archiving solutions for any organisation.

## Secondary Storage

Solve your data protection issues by converging your data backup, recovery, replication and disaster recovery on a single, hyperconverged, cloud-native platform. Our solution eliminates data silos and simplifies management of data across multiple locations from on-premise to the cloud and edge. You get complete control of your data and valuable insight with google-like search functionality that searches file data for potential regulatory and compliance violations, and allows you to run custom queries to find information including PII, and GDPR red flags.

# Business Continuity

## Disaster Recovery as a Service

Working seamlessly with the Cloud Backup solution, our DRaaS solution provides complete peace of mind. Managed through our online control panel, we can rapidly restore your business critical data with low RPO's and near instant RTO's to minimise any disruption or revenue loss.

## Hosted Virtual Desktop

Our virtual desktop takes your office to the cloud, enabling your workforce to access business applications and data anywhere, at any time, through any internet connected device.

## Dynamic Workplace Recovery

Guarantee your business access to an unparalleled network of over 3000 Regus office recovery locations in the event of an emergency with an immediately accessible internet and telephony connected workspace. We ensure minimal down time and risk of loss enabling your staff to get back to work and connected to your IT systems as quickly as possible.

# Managed Services - Let us take away your IT management burden with 24/7 expert support

## Cloud Email

Complete enterprise grade business email and collaborative message services including integrated social media accounts delivered in the cloud. Easy to use, highly available, secure and cost effective, designed for today's communication needs and backed by our guaranteed SLAs.

## Domain Management

Managing a large portfolio of domain names can be very time consuming and complicated. As one of a select few ICANN accredited registrar's in the UK we are trusted by global brands to manage portfolios from 1, to 1000's of domains. Our service covers new registrations, renewals, acquisitions, invoicing, transfers, and portfolio consolidation. We also offer monitoring and enforcement services to ensure your domains are fully protected, monitored and secure.

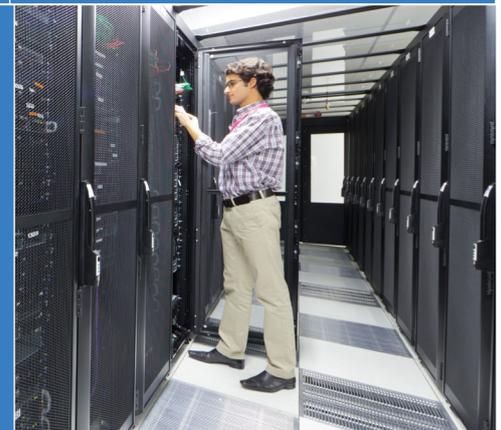

All the features and benefits of an AWS hosting solution backed by the infrastructure and management expertise of iomart. Fully Amazon qualified technical account managers will work with you to develop collaborative and bespoke specification to fit your needs from pure AWS to hybrid solutions or anywhere in between.

## Cloud Edge Support

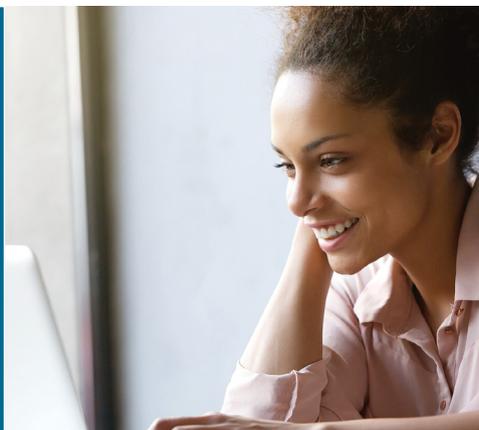

Cloud Edge allows iomart to become an extension of your IT team with easy access to 3rd line support resource online. This service is available as a standalone service and provides support on a wide range of technologies including Microsoft Azure & Stack, Office365, Sharepoint, Exchange, Windows 10, AWS and security.

# Microsoft Managed Services

## Office 365

With Office 365 from iomart, you can get work done from virtually anywhere. Everything you need on the devices you use the most - your documents, email, calendars, contacts and team sites all come with you. Automatic updates, document access control and collaboration across devices mean you're always working on the latest version.

## Exchange

The feature-rich Microsoft Hosted Exchange platform comes back with all the features and functionality you'd expect from one of the most popular mail solutions in the world. Hosted within our state-of-the-art data centres, this email solution is secure, resilient and backed by our impressive SLAs.

## Windows Azure

The breath and flexibility of the Azure Cloud suite, built on Microsoft's infrastructure, provides a secure and reliable platform for your cloud services. With the expert management and support from iomart's dedicated Azure Team, we can cut through any complexity to ensure that you maximise your Azure platform and can meet any requirements you may have for a hybrid solution.

# Managed Cloud Hosting Solutions

## High Performance Dedicated Servers

Raw power with guaranteed computing performance. Tier 1 hardware racked and ready to go. Simply deploy your preferred range of computing options to create your perfect cloud solution with the entire server compute power for your sole use – perfect for meeting high compute demands

## CloudSure Managed Cloud

The ultimate enterprise cloud experience – designed to deliver outstanding reliability and results. Our fully managed shared hardware platform delivers flexible and elastic cloud solutions from on demand virtual servers and storage. The highly available platform is backed by our secure infrastructure and SLAs.

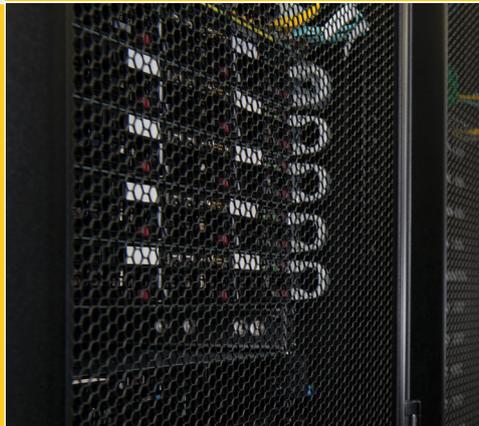

## CloudSure Hybrid Cloud

The perfect solution for organisations with a need to strictly control core elements of their IT network, but who can benefit from extending into a secure cloud environment. Blended mix of physical servers and public and private cloud solutions, fully secure and accredited, allowing you to develop complex and bespoke architectures to exactly fit your needs.

## Azure Stack

Get all the power of the public cloud, but in a private data centre realising the full potential of hybrid cloud. Azure Stack lets you leverage Microsoft's hyperscale resources but, as it's hosted in one of our ultra-secure ISO-accredited UK data centres, you maintain full control over your data and applications.

## CloudSure Private Cloud

Dedicated infrastructure, platforms and software in an easily managed and cost effective solution. The perfect solution to even the toughest security challenges, meeting the strictest legal and regulatory concerns. This provides a dedicated resource without losing the protection or security of an on premise solution.

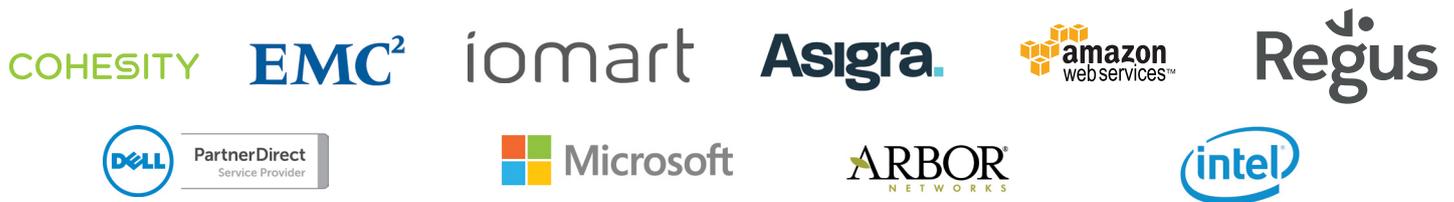

# Why we're one of the World's leading Cloud Companies

Working with you at every stage of your cloud journey – from discovery to delivery – we'll help you navigate the complexities involved in building and operating cloud systems.

Accredited experts in all flavours of managed cloud - from AWS, Azure, Hybrid and Private clouds - we are vendor, platform and technology agnostic and will recommend the cloud environment to meet your specific strategic business needs.

With a global infrastructure, fully certified to supply services to both the public and private sectors, and with over 300 technical experts on hand, we are ideally placed to deliver:
