

 Zoho Creator
The Zoho logo consists of the letters 'Z', 'O', 'H', and 'O' in a stylized, colorful font. The 'Z' is red, the first 'O' is green, the 'H' is blue, and the second 'O' is yellow. To the right of the logo, the word 'Creator' is written in a white, sans-serif font.

Build a custom app in 5 minutes

Zoho Creator is a low-code platform to build, test, and deploy web and mobile apps.

“Low-code platforms make software development
10 times faster than traditional methods.”

FORRESTER®

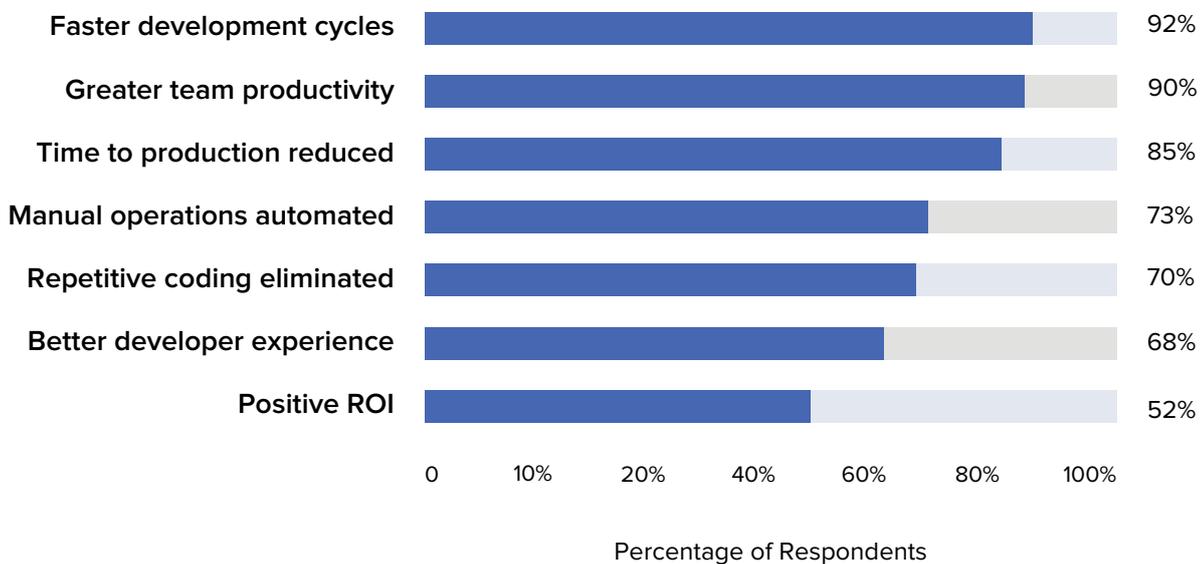

2 million apps | **10,000** customers

170 countries | **12** years

What is low-code?

Low-code development is a technique to build software faster, by allowing developers to dive straight into the business logic without getting stuck with infrastructure and other tedious implementations.

Why do enterprise IT developers prefer using low-code platforms?

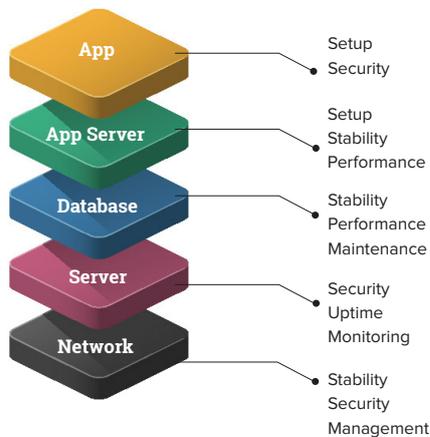

Source: Enterprise low-code user survey

“ By 2020, at least 50% of all new IT line-of-business applications will be created with [Rapid Application Development] RAD tool sets, such as a no-code platform.”

Gartner

Why use Zoho Creator?

Creator abstracts 90% of the code

Boost developer productivity

Build custom apps, ranging from a simple call log to a complex ERP solution, **10x faster** with Zoho Creator. Our **intuitive low-code builder** helps you add business logic, automate workflows, and set up integrations without extensive code.

Save tons of time

Focus on just building apps as Creator rewards you with the **end-to-end app management** benefits of:

- Zero setup
- One-click deployment
- Built-in security
- Seamless scalability
- Automatic upgrades
- Periodic backups

Build once deploy anywhere

Zoho Creator automatically configures your apps for a **variety of devices** without requiring any extra code. You can also deploy the app files at your workplace through MDM tools.

Integrate faster

Connect to databases, legacy ERPs and identity solutions easily using abstract APIs.

Improve agility

Your apps are up and running as you create them. **Customize apps anytime** to adapt to the changing needs of market, customers and your organization.

Share securely

With **role-based access**, each user can be assigned permissions to access only the functions they need, permitting collaboration while keeping sensitive data secure.
