

UberConference

is a web-based conferencing platform with no PINs or downloads required.

Why UberConference?

ANYWHERE ACCESS

With a few clicks, remote employees and international participants can join your meeting in a matter of seconds.

- Web-Based Conferences
- No PINs
- No Downloads
- International Access in 50+ countries

INTEGRATES WITH YOUR APPS

UberConference seamlessly integrates with the apps you know and trust. With these integrations, you're able to find all the information you need without switching between tabs. We integrate with apps like:

- G Suite (Gmail, Google Calendar)
- Office 365 (Outlook, O365 Calendar)
- Dropbox
- Evernote

RELIABLE CALL QUALITY

UberConference is fundamentally built on WebRTC. WebRTC technology delivers better quality and is more adaptive to packet loss, jitter and latency. WebRTC makes UberConference more adaptive and modern, and allows us to deliver high quality and reliable voice without requiring a separate dedicated voice pipeline.

We offer Free and Business Plans for UberConference.
