Located in the mountainous region of Wenzhou, Fx Mayr Wellness Eco Retreat is a truly holistic eco-wellness retreat to be constructed in China.

“The architecture is designed to rest very lightly on a natural terrain, minimizing the impact to its surroundings. Its iconic form as a loop suggests an embrace of energy from the mountain, as well as an infinite and continuous experience, between body treatment and a quality natural environment.”

The 3-storey loop is to be constructed in timber structure, and will be the largest of its kind ever built in China. The choice of natural building components and energy-saving MEP solutions make the architecture truly a leading pioneer in sustainable construction in China.

Along the loop, guests enjoy an expanded view towards the beautiful valley layered with rice terraces; underneath it, people are in touch with the earth, appreciating the wild and untouched nature through various outdoor activities.
