McCAULEY TRAILERS

MAC TRAILERS

Commercial Product Range

MAC Commercial Trailers are built to meet each customer's specific requirements while delivering the most efficient and cost-effective transport solutions. Every order is reviewed in-house, with a wide range of options available to ensure the trailer supplied matches the customer's exact needs. All MAC Trailers comply with EU standards and international export regulations.

Machinery Carriers

The **MAC Drawbar Machinery Carrier** offers a 9.5-tonne gross carrying capacity, making it ideal for transporting most small machinery without the need for larger haulage equipment. Compact in design, it comes equipped with EBS and air brakes, fully compliant with legal requirements for transporting loads over 3.5 tonnes.

2 Axle Drawbar Low Loaders

The **MAC 2 Axle Low Loader** delivers a 19-tonne gross capacity and is available with air suspension. Designed to meet specific customer requirements, these trailers are widely used across construction, road servicing, and utilities for moving plant and machinery such as excavators, pavers, planers, and tar spreaders.

3 Axle Drawbar Low Loaders

The **MAC 3 Axle Low Loader** is built with a 25-tonne gross capacity, providing additional strength and stability for heavier plant and machinery. Like the 2 Axle model, it is trusted by contractors for efficient, reliable equipment transport.

2 Axle Drawbar Platform Trailers

The **MAC 2 Axle Drawbar Platform Trailer** is available with single or twin wheels, offering gross capacities of 12 or 17 tonnes. These versatile trailers are widely used in the waste, construction, and transport industries for carrying materials and equipment. Options include twist locks for a standard ISO 20ft container, a telescopic drawbar, demountable headboard, and pull-out extension—ensuring the trailer adapts easily to multiple applications.

McCAULEY TRAILERS

MAC TRAILERS

Stepframe Trailers

MAC Stepframe Low Loaders are designed for the transport of heavy plant, machinery, and equipment with capacities ranging from 20 to 80 tonnes. The range includes models such as the latest **EU44T**, as well as 2 Axle, CAT 1 3 Axle, 4 Axle, and Extending Stepframes—ensuring a solution for a wide variety of haulage needs.

Platform Trailers

Built to customer specifications, **MAC Platform Trailers** are reviewed in-house to guarantee the right fit for each operator. With a 44-tonne gross capacity, these trailers are available in extendable and stepframe versions, making them an excellent choice for general or oversized heavy haulage.

Brick & Block Trailers

The **MAC Drawbar Flatbed Range** is widely used across the construction, waste, and transport sectors for moving materials and equipment efficiently. This includes specialized **Brick & Block Trailers** for secure and reliable handling of heavy building materials.

Turntable Trailers

The **MAC Turntable Trailers** are Available in 2, 3 and 4 axle configurations, these come in both Flatbed and Low Loader variations and range in carrying capacities from 18 tonnes to 44 tonnes gross.

Custom Builds

Beyond our extensive standard range, MAC also specialises in **custom-built trailers**. Our in-house design team works closely with operators to tailor trailers to exact industry requirements. Whether adding bespoke features to an existing model or developing a completely new design, we ensure every trailer is engineered to meet the customer's needs.
