Smartview360 connects and records from new mirrorless HGV trucks

Smartview360 is the UK's first fully supported, end-to-end video recording solution designed to capture footage directly from your vehicle's OEM digital wing mirrors, with video data securely transmitted to our FVLink portal.

98.8% Footage retrieved first time

FVLink delivers live camera access, recorded evidence, smarter fleet management and streamlined incident handling – all in one platform.

FVLINK
CCTV Live Access

The system can also integrate additional third-party cameras, supporting up to eight cameras in total, (including the digital wing mirrors), for comprehensive 360° vehicle coverage.

HOW SMARTVIEW360 WORKS

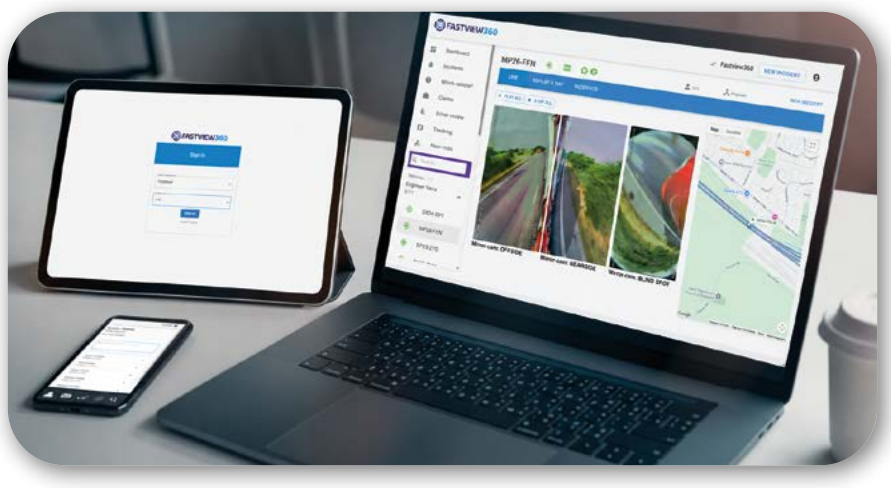

01. CAPTURE

Footage from your digital wing mirrors - add other cameras for a total of 8 feeds.

02. CONNECT

Smartview360 provides reliable HD recording, and delivers the video data to our FVLink portal.

03. CONTROL

Our FVLink portal gives you live access for tracking, incident management and much more.
