

Targeted eLearning Built for UK Roads

A comprehensive suite of online courses to guide your drivers on the road to improved safety

Managing driver risk means more than monitoring incidents and behaviours — it means taking action. Our ever-expanding suite of online courses uses high-quality 3D visuals to bring real-world driving scenarios to life, covering the situations your car, van and HGV drivers face every single day. Courses feature UK-specific narration, road rules and signage, as well as familiar vehicles and scenery, ensuring that training always feels relevant and credible to your drivers.

HOW OUR TRAINING WORKS: A MASTERY-BASED APPROACH

Our eLearning is built around a 'mastery-based' methodology. Drivers must demonstrate genuine understanding of the material before they can progress through each stage of a course — giving you confidence that the training has been digested, not just skimmed through.

Courses are short and engaging by design, using 3D visuals and interactive formats to boost attention and knowledge retention, with quizzes and exercises to reinforce learning over time.

Our Course Catalogue

Whether you need to address a specific incident, reinforce ongoing safe driving habits, or build a culture of proactive risk management across your entire fleet, SambaSafety has a course to meet that need.

SambaSafety offers two core series of training, each allowing you to address the needs of your drivers with the right level of depth. Every course has a version applicable to each specific vehicle category, with the content tailored to highlight the particular challenges and scenarios faced by drivers of that vehicle type.

-  Cars
-  Light commercial vehicles (LCV)
-  HGV Class 1
-  HGV Class 2

PRO-DEFENCE COURSES

A comprehensive defensive driving programme covering those areas that form the core of a safer approach to driving in the UK, designed to equip drivers with the knowledge and skills to anticipate road hazards, manage risk proactively and avoid costly incidents. Topics covered include:

- > An approach to safe driving
- > Essential planning
- > Controlled speed
- > Evaluating space and following distance
- > Navigating hazards
- > Driver distractions
- > Effective communication
- > Fatigue management

MICRO-LEARNING MODULES

Short, focused refresher modules designed to be completed quickly and retained easily; ideal as post-incident reminders or as part of an ongoing skills reinforcement programme. Topics include:

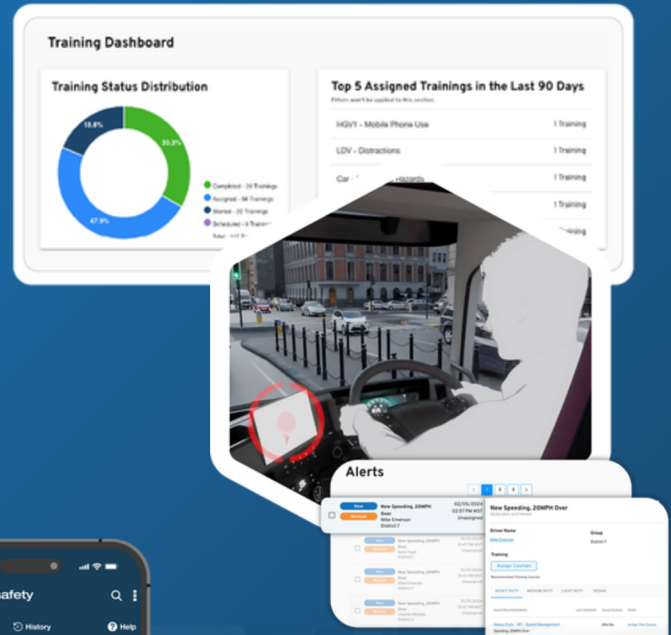

- > Mobile phone use
- > Following distance
- > Rear-end collisions
- > Slippery roads
- > Stop signs and traffic control devices
- > Smoking behind the wheel
- > Animal collisions and much more.

FEEL THE BENEFITS OF SAMBASAFETY DRIVER E-LEARNING

- **Reduce incidents and claims.** Equipping drivers with defensive driving skills can directly reduce the frequency of collisions, protecting your people, your vehicles and your bottom line.
- **Improve driver retention.** When drivers feel valued and supported, they stay. On average, companies using SambaSafety's training platform report a 57% improvement in driver retention.
- **See measurable results, fast.** Companies combining driver monitoring and online training have experienced a 77% reduction in driving offences after 12 months — and a 46% greater reduction in offences compared to monitoring alone.
- **Foster a genuine safety culture.** Data-driven training assignments eliminate bias and reinforce individual relevance. This helps drivers feel respected, engaged, and ready to embrace safety as a value, not just a compliance requirement.

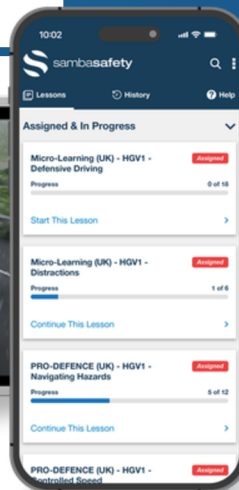

STREAMLINE YOUR RISK MANAGEMENT

By bringing monitoring and training together on one platform, you can move from identifying risk to addressing it in a matter of clicks, with an automated workflow that lets you track the impact of your training programme.

TRAIN ANYWHERE, ON ANY DEVICE.

SambaSafety's convenient mobile app means drivers can complete training at a time and place that suits them, with push notifications for assignments and due dates keeping everyone on track.
