# Smart Cargo Monitoring

Elevate trailer visibility with dual in-load HD cameras. Measure and monitor cargo remotely and receive smart video alerts for door motion events. AI cameras monitor loading times, trailer occupancy and allow remote spot check on cargo. Door sensors continuously monitor door status and send alerts for any door openings or closings. A dedicated GPS/4G trailer camera and tracking solution with no tractor installation required.

## Cargo monitoring and load measuring cameras

- 01 Dual 4K live view cameras for in-trailer monitoring
- 02 Automated trailer occupancy calculation & reporting
- 03 Door status and door open alarms
- 04 End-to-end cargo visibility

### Loading Optimisation

Cargo scanning and load optimisation technology

### Trailer Only Installation

Trailer only installation. No tractor integration required

### Trailer Tracking

Dedicated trailer location tracking

Dual Cameras: AI 4K cameras monitor & alert for door motion and scan for cargo optimisation.

ABS: No hard wiring to the tractor cab. GPS, 4G, wifi, and solar power are all contained within.

Door sensors: Alert to any door opens during transit or configured non-standard loading times.

## AC Cloud Video Safety Platform

Realtime cargo monitoring, trailer tracking, video playback and alarm events are all viewed within AC Cloud. Set geofences, share video, live location and download footage as proof of dispute. Network with other ACSS AI, live view and Bridge Strike technology.
