# FULLY AUTOMATED BREATHALYSER SYSTEM WITH FACIAL RECOGNITION

Worksober is a fully automated alcohol screening system for alcohol testing in the workplace. Linked to the cloud via WiFi, LAN or Mobile Data the Worksober identifies employees with facial recognition technology and automatically carries out breath testing according to your requirements.

A photographic proof of test is uploaded in realtime to be viewed anywhere in the world via a standard browser portal with alerts for positive tests via email or SMS.

It functions autonomously with no need for maintenance, staff or costly consumables.

Turnstiles | Gates | Access Controls | Door Locks | RFID Readers

## Create an alcohol-free workplace

Testing takes less than 10 seconds and costs as little as 38p per employee, per month - with NO additional staffing costs.

### A SOBER WORKFORCE

Worksober is a wall mountable device that automatically tests your workforce on a daily or random basis.

### EMPLOYEE ID

Automatically identify your employees and provide evidential results with facial recognition and RFID technology built-in.

### DATA IN REAL-TIME

Access entry and test data stored on cloud with any device and get real-time system alerts via email or SMS when alcohol is detected.
