

Sentinel: Smarter Theft Protection

Sentinel protects parked vehicles by monitoring high-risk downtime and detecting threats before incidents occur. From fuel theft and cargo interference to vandalism and tampering, it helps fleet operators stay ahead of theft and damage incidents. Instant alerts and low-light video evidence support rapid response and investigations.

24/7 Parked Vehicle Protection with AI Video Intelligence

- 01 Detects theft, tampering, and suspicious activity
- 02 Instant alerts when risks are identified
- 03 Clear low-light video for evidence and claims

Post-Ignition Monitoring

Protection for up to 90 days after vehicle shutdown

Smart Alerts

Get notified instantly when suspicious behaviour is detected

Parked Vehicle Security

Protection during breaks, overnight stops, downtime

Why Fleet Operators Choose Sentinel

Fuel Theft Detection

Detects activity around fuel tanks and potential theft attempts.

Curtain & Cargo Interference Detection

Detects cutting, tampering, or forced access to trailers, curtains, and stored goods

Suspicious Area Intrusion Alerts

Monitors high-risk zones around vehicles and triggers alerts when intrusion is detected

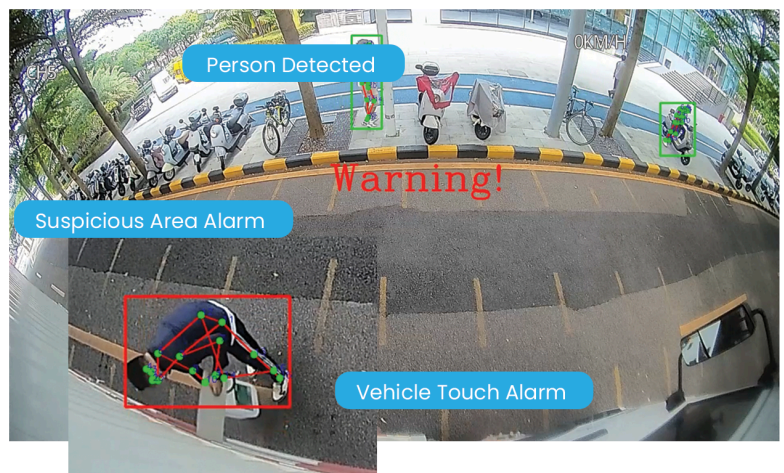

Vehicle Touch & Tamper Detection

Recognises vehicle contact to help identify vandalism, break-ins, and theft attempts.

See Sentinel in Action

- ▶ **Detect**
AI identifies suspicious activity around parked vehicles.
- ▶ **Alert**
Fleet managers receive instant notifications.
- ▶ **Investigate**
Video evidence is available through the platform.
