

REDUCE COSTS and INCREASE THE EFFECTIVENESS of your DRUG & ALCOHOL SCREENING POLICY

### Vehicle Interlocks

An Alcohol Interlock can be fitted to a vehicle or piece of machinery to prevent it being operated by someone under the influence of alcohol.

Drivealyzer is our low cost solution. Starting at just £845, the system ensures 100% safety 100% of the time.

Wired into the ignition system of the vehicle, the user must provide a clear sample to start the engine. Unique replaceable handset system and optional telematics at an unbeatable price. AlcoDigital are also UK Draeger Channel Partner to fit and support the range of fully type-approved Draeger Interlocks.

### Calibration & Servicing

As authorised service partners for the majority of all alcohol testing manufacturers, we are approved to calibrate over 60 models of breathalyser – more than any other UK company.

We pride ourselves on our fast efficient service at a competitive price unrivalled in the UK market, offering services such as Express Same Day turnaround and Courier Collect & Return.

Up to 256 units integrated in real time across multiple locations and sites

### Worksober cloud-based automated alcohol testing

Worksober is the very latest Alcohol Testing technology using facial recognition to identify and photograph those being tested.

Designed to remove the manpower element of ensuring your workforce are alcohol-free, all results are instantly uploaded to the cloud and the whole system is managed remotely. Instant notification by SMS/email for any violations and single portal access for multiple devices enables simple management of your alcohol screening requirements.

### AlcoDigital Academy

CPD Accredited training in Alcohol and Drug testing

For any Workplace Test policy to be successfully implemented, competence and confidence of the end user is crucial. From face to face bespoke courses tailored to your specific needs, to weekly hosted webinar training sessions, and eLearning refresher courses – our award-winning training is at the forefront of our business.

Covering all aspects of workplace testing including legislation, policy advice, best practice procedures and practical product training, we have a training solution to suit all budgets.

## WORKPLACE COMPLIANCE

### Alcohol Testing

We offer the widest range of alcohol testing devices of any UK Supplier. From instant screeners like our low cost, simple and quick AlcoSaber and the Unique AlcoDigital Eon, with EN Approval, bluetooth connectivity, print facility and replaceable sensor system to the full range of worldwide approved Draeger AlcoTest devices.

### Drug Testing

From our single use DrugSTOP lateral flow saliva kits to the UK Home Office Approved Draeger DrugTest 5000 digital analyzer, we offer a wide range of drug testing equipment to suit all budgets. Simple, easy collection process and easy to interpret results, our Deterrent Packages offer the most cost effective method of ensuring your workforce are free from drugs of abuse.

### Laboratory Confirmation Testing

Fully defensible including Chain of Custody requirements.

Our Lab Confirmation packs offer dual-sample saliva test kits for use by in-house personnel to verify positive pre-screening results. With the Certificate of Results issued within 72 hours of receipt into our UKAS-Certified Lab, our Lab Confirmation service ensures your company is protected against any challenged action.

AlcoDigital have been providing specialist Drug & Alcohol equipment and services since 2002. Advice, certified training and authorised service facilities, together with our position as UK Draeger Authorised Partner ensure our position is maintained as one of the most respected teams in the business.

We advise a range of organisations including national government (MoD, HM Prisons, NHS and Probation Services, local authorities, and some of the UK's largest PLCs such as BP, Wincanton, Veolia, Next, and Aldi) enabling them to develop & implement In-House Drug & Alcohol Screening programs.

## Drugs and Alcohol at work – the statistics:

- > 1 in 9 motorists have admitted to 'Drug Driving' (ROSPA)
- > 18% of road deaths involve alcohol or drug impairment (ROSPA)
- > 3-5% of all absences at work are caused by alcohol or related issues (HSE)
- > Between 8-14 million working days are lost every year due to drug or alcohol (HSE)
- > 13.6% of "white collar" (management/supervisory) staff admit to drug use at work (NiDA)
- > 38% of 16-40 years olds have experimented with illegal drugs (DrugScope)

## Key benefits of In-House Drug & Alcohol Screening vs Outsourcing:

- > **Dramatically reduced costs**
- > **Far greater deterrent** – since testing can be ad-hoc, on demand or scheduled over a wide range of times and places.
- > **Unexpected** – Pre-scheduled testing is far less effective as employees have prior knowledge of when to expect testing to occur.
- > **Instant results** – outsourced results often take several days. Instant results means action can be taken immediately when necessary.

AlcoDigital are also highly regarded by many in the Media. AlcoDigital Director Suzannah recently appeared as UK Drug & Alcohol Safety Expert on ITV's "Tonight" show investigating drink-driving limits and last year gave over 20 radio station interviews including Five Live, Radio 2 and LBC. Press comment was sought for over 230 articles covering a wide range of topics on Drink-Drive Cyclists, Prescription Drug use and the French Breathalyzer Law.
