

★ RTX NORTHERN IRELAND 2026 — OFFICIAL PARTNERSHIP LAUNCH

STANADYNE PERFORMANCE FORMULA

DIESEL FUEL ADDITIVE

Ireland's only Parker Authorised Truck Centre brings you the new and improved multifunctional diesel fuel additive — designed for the modern engine, proven across every market.

FUEL COSTS RISING

With diesel prices at record highs and continuing to climb, Stanadyne delivers **proven, measurable fuel savings** — an independent Wakefield Council fleet trial recorded up to **7.86% fuel saving**, saving £55,000 annually across a **500-vehicle fleet**. Reduced emissions and maintenance costs included.

— WHAT IT DELIVERS

4x

Stronger Detergency

New generation formula cleans deposits, varnishes & contaminants from the entire fuel system.

+5%

Power Restoration

Remove contaminants and get your engine back to full designed performance.

+4

Cetane Points

Smoother combustion, shorter ignition delay, improved cold starts and reduced emissions.

-30°C

Cold Flow Protection

Prevents cold filter plugging — engine fires immediately even in harsh conditions.

360°

Full System Protection

DPF protection, anti-corrosion, fuel stabilisation and enhanced water separation.

HVO

HVO Compatible

Tested and confirmed compatible with R30 and R100 renewable fuels. No issues.

SUITABLE FOR ALL MARKETS

- Agriculture & Farming
- Construction & Earthmovers
- Automotive & Transport
- Industrial & Power Generation
- Marine Applications

WHY NOW?

- Diesel prices at sustained highs — every drop must work harder
- Tightening emissions legislation across Ireland & UK
- DPF failures increasingly costly — prevention is key
- Latest technology from world's leading fuel chemists
- Dual brand recognition: Parker & Stanadyne

★ EXCLUSIVE PARTNERSHIP — RTX 2026

Flowtech: Ireland's Only Parker Truck Centre

We are proud to launch our exclusive Parker partnership at RTX Northern Ireland 2026 — making Flowtech the sole authorised Parker Truck Centre across the island. Available through our Dublin and Cork sites with expert technical support.

Dublin

Cork

Belfast

HOW IT WORKS

THE SCIENCE OF BETTER FUEL

Used by world-leading chemists. Tried and tested high-quality product. Dual brand recognition: Parker & Stanadyne. Latest technology built for the modern engine.

— SIX ACTIVE MECHANISMS WORKING FOR YOUR ENGINE

01
Detergency
CLEANING THE FUEL SYSTEM
Disperses deposits, varnishes and contaminants. Restores lost power, improves efficiency and prevents performance losses across the full fuel system.

02
Lubricity Improver
FRICTION MODIFIER
Reduces friction between fuel and engine components. Protects high-pressure pumps and injectors. Improves engine efficiency by reducing power lost to friction.

03
Cetane Improver
IGNITION QUALITY
Higher cetane = shorter ignition delay, complete combustion, better engine performance, improved cold starts and measurably reduced CO and CO₂ emissions.

04
Anti-Oxidant
FUEL STABILISATION
Prevents oxidation, sedimentation and Diesel Bug growth that clogs filters and injectors. Especially critical for biodiesel blends and fleet applications.

05
Cold Flow
DOWN TO -30°C
Lowers the freezing point of diesel. Increases filterability in cold conditions, prevents filter plugging and ensures your engine fires immediately every time.

06
Anti-Corrosion
COMPONENT PROTECTION
Inhibits corrosion and rusting of iron and steel components throughout the system. Extends component life — critical for biodiesel and high-blend fuels.

— FULL PRODUCT SPECIFICATION

- ✓ New Gen Detergency (4x)
- ✓ Extra Lubricity
- ✓ Cetane +4 Points
- ✓ Cold Flow to -30°C
- ✓ Water Removal
- ✓ Filterability
- ✓ Low Emissions
- ✓ Fuel Economy & Power
- ✓ DPF Protection
- ✓ Anti-Corrosion
- ✓ Fuel Stabilisation
- ✓ HVO Compatible R30-R100

HVO READY Confirmed compatible with synthetic and HVO fuels. Parker's chemists have completed long-term compatibility tests on Racor/Fuel Manager filters — highly effective at controlling deposits in R30 and R100 fuels. Mixed freely with diesel with great success and no issues.

ABOUT FLOWTECH — YOUR PARKER PARTNER IN IRELAND

Ireland's Only Parker Authorised Truck Centre

Flowtech is a Flowtech Company — a world of motion. We are proud to carry the distinction of being **Ireland's only Parker Authorised Truck Centre**, launching officially at RTX Northern Ireland 2026. With sites in Dublin and Cork (and Belfast as our northern base), we bring the full weight of the Parker product portfolio — including Stanadyne fuel additives, Racor filtration and Fuel Manager systems — directly to customers across the island. Our team provides **expert technical advice, complete installation services and tailored solutions** built around your operation. Protect the Earth. Our Health. Your Reputation.
