VEHICLE TELEMATICS

What is Vehicle Telematics?

Vehicle telematics refers to the integration of electronic fleet management devices to track and monitor vehicles. It collects, transmits, and analyses data related to vehicle performance, compliance, location, behaviour, and other relevant parameters.

Companies using telematics see a **15% reduction in fuel costs** due to optimised routes and reduced idling.

Predictive maintenance enabled by telematics can cut unexpected breakdowns by **75%**, **reducing downtime and repair**

Harsh braking and rapid acceleration alerts can lead to a **20-30% decrease in risky driving behaviours.**

Companies using fleet management software report an **improvement in vehicle utilisation of 10-15%.**

Features:

- ✓ Monitoring and Analysis
- ✓ Driver Behaviour Monitoring
- ✓ Safety and Security
- ✓ Data-Driven Decision Making
- ✓ Route Optimisation
- ✓ Insurance Benefits
- ✓ Regulatory Compliance

VEHICLE CCTV

What is MANTIS Recon?

MANTIS Recon offers a cutting-edge connected camera system designed to enhance fleet safety and improve risk management!

Features:

- ✓ Evidence-based Driver Coaching
- ✓ 360 Degree AI Cameras
- ✓ On-Demand Footage Retrieval
- ✓ Live Streaming
- ✓ First Notification of Loss (FNOL)
- ✓ Integration Options

MANTISTM
RECON

Up to **80% Fewer Accidents** after installing cameras.

Fleets using cameras experienced a **70% success rate** in proving that the company driver was not at fault in collisions.

Up to **80% of claims** were dismissed or reduced when fleets had cameras

56% of fleet operators saw improvements in driver behaviour following the deployment of vehicle CCTV.
