

BOLLEGRAAF RECYCLING SOLUTIONS

Through continuous and intensive investments, Bollegraaf Recycling Solutions has become the market leader in household waste and plastic recycling technology. We are a pioneer in the field of process technology & automation and robotics. Bollegraaf is synonymous with rock solid and unsurpassed reliability. With our know-how, scale and organisational capacity, we are the discussion partner for large market parties when it comes to integrated, turnkey sorting installations.

“Creating a World of Difference” is the message we put out to society in general and recycling parties in particular. Together we make a world of difference in the market. Decisive technology enables us to meet fundamental challenges together with our clients. That’s how we’re building a truly sustainable global future.

Bollegraaf plays a distinctive role in the recycling chain as a Recycling Director. We are able to monitor complex sorting installations remotely and to manage and optimise them together with the operator. Through close partnerships we bear joint responsibility for a maximum separation fraction and minimum costs per kilo of processed waste. Backed by excellent service and long-term maintenance contracts, our solutions generate the highest possible ROI.

PLASTICS

CREATE VALUE OUT OF PLASTICS

Optimizing output in terms of economic value against the lowest possible costs per tonne. This is the short-term goal for every installation that Bollegraaf provides. The long-term goal is to ensure permanently low operating costs and achieve an optimal return on investment.

The worldwide demand for recycling of used plastics is growing rapidly as more and more applications are being introduced for the increasing demands and encouragements to use recycled plastics. Recycling companies who are contemplating in investing in plastics sorting equipment will expect to find their return in investments to be of a profitable venture. Bollegraaf’s effective and innovative solutions in design engineering, have mastered the manufacture and supply of equipment to effectively remove the plastics from waste; preventing it to become landfill. Our equipment is currently introduced into existing combined waste streams and complete dedicated (plastic) sorting installations.

The purpose of this installation is to separate, sort and process valuable packaging materials, such as PET, PE, PP, and Tetrapak, ferrous and non-ferrous metals, which are then baled and shipped for reuse.

ADVANTAGES OF WORKING WITH BOLLEGRAAF

With more than 55 years of experience worldwide, Bollegraaf is one of the most knowledgeable suppliers on the planet. We know there is no single specification for the composition of your waste; it can vary per country, per region, or per city. The requirements for the output of the separation system may also vary, depending on the available markets for recycled products. This is why we believe versatility is key. It inspires us to engineer, build and deliver tailor-made solutions that are easy to use, have a low cost of ownership, perform to your specifications, and offer an excellent return on investment.

Versatility

Our installations can be easily adjusted to fluctuations in input streams and/or output requirements. Even daily variations in waste streams can be handled by the adjustability/fine-tuning possibilities of most of our machines. This ensures that a Bollegraaf installation will last for many years and remain up-to-date. Even if the market changes, our installations have the ability to change with it.

Quality

We believe in putting quality above all else. That's why we only use name brand components from experienced suppliers. This ensures our installation will provide the durability you require so you get efficient performance every day with as little downtime as possible. We guarantee your installation will be trouble-free for many years to come.

Customization

We always put our customers first. Our worldwide delivery program consists of complete sorting systems for the waste paper industry and plastics recycling, collectors of industrial waste and household waste, municipalities, and companies that produce voluminous waste. We also feature R&D backup for custom-built products so we can always offer our customers a one-stop shopping experience that meets their exact requirements, whatever they may be.

Eco-friendly

We are not just active in an industry that's rapidly going green. At Bollegraaf we are also very aware of our own corporate responsibilities towards the environment. From our water-based green paint to investments in the latest innovations for reducing energy and oil consumption to the use of recycled materials for all our communication and promotional activities, we are making a conscious effort to help protect our planet.

Experience

55+ years of worldwide experience in all areas of recycling. We know the local market characteristics and requirements as well as local laws and regulations, and we anticipate market changes in collaboration with our clients. We know recycling!
