

Facility Type : **Recycling of PP**
Facility Area : **8 Acre Lush Green Campus**
Employees : **50**

Machinery:

- Automatic Sorting Unit
- Vibro Systems
- Baling Machines
- Optical Sorters
- Automatic Bag Packing Machines
- Magnetic Separation Line
- Grinders
- Specialized Washing Lines for all physical forms
- Extrusion Lines for all physical forms
- Shredders

Total Production Capacity: **10,000 TPA**

Sr. No.	Quality	Grade	Color
1	rPP	Raffia	White
2	rPP	Extrusion	Natural
3	rPP	Blow	Natural
4	rPP	Blow	White
5	rPP - 10	Injection	Black
6	rPP - 15	Injection	Black

*** TECHNICAL SPECIFICATIONS ARE AVAILABLE ON REQUEST**

Production of plastic granules from PCR waste

➤ Strong waste collection network

- 400 + Aggregators / collection Partners from 22 + states of India
- Collection contracts with many NGOs / MRFs / ULBs / WMCs
- Network of our own collection centres
- 100% traceability of material

➤ Segregation, sorting, grinding & washing

- Strict check of incoming material and segregation of inert impurities
- Segregation based on non-plastics, polymers, color, grades & physical form
- Optical sorters for bottle, flakes (color / polymer) sorting
- Specially designed washing line for specific materials like rigid / flexible / raffia etc.

➤ Granualization & Dispatch

- Fully equipped extrusion lines for Polyolefin
- Auto packing in all types bags (small bag to big bags)
- Batch to batch tracking from raw material to finish goods
- Frequent online QC test within each batch
- Grade wise and batch wise storage of finish goods
- Complete weight monitoring system from production to loading
