

Powering sorting with NIR & AI

Dedicated to Food/Non-Food grade and cleaning

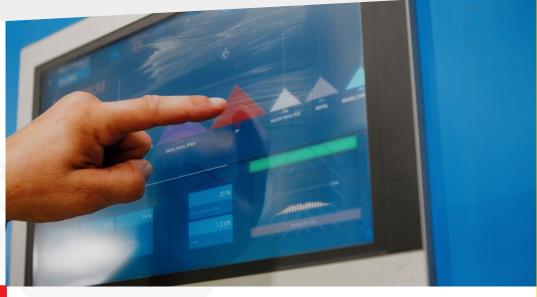

PE F/NF

PS F/NF

HIGH-PRECISION SORTING

Separation of food & non-food plastics grade and aluminium grades using AI+RGB+NIR/VIS

INCREASED RECOVERY

Reduction of false rejects and **yield improvement**, preserving valuable

preserving valuable materials in the correct streams

QUICK & EASY INTEGRATION

Installation directly on existing Mistral+

CONNECT & COMPACT+

with no layout change or footprint expansion

FUTURE-PROOF & ADAPTABLE

Continuously updated
Al models to keep pace
with evolving packaging
and regulations

RELIABLE & SUPPORTED

Backed by expert service, sensor fusion technology and ongoing model upgrades

BY YOUR SIDE AT EVERY STEP

Local Support with skilled technicians & 24/7 tele assistance

The main issue we aim to address concerns contaminants found in the polyethylene stream, such as diving fins, flip-flops, or sneakers. Thanks to the artificial intelligence module developed by Pellenc ST, we have enhanced the quality of our products and increased production capacity without requiring additional employees.

With Pellenc ST's Al technology, we have been able to meet our customers' requirements, earn their trust, and now avoid any potential quality-related claims.
