Market Leader, Environment

Welcome

Microtunneling enables innovative solution for a water system upgrade.

We collaborated on an infrastructure upgrade for the Greater Toronto Area that minimized environmental impact.

Employing our expertise in trenchless design

Aging infrastructure in both an urban environment and ecologically sensitive area, such conditions could have meant a potentially costly and disruptive infrastructure upgrade for a sewer project in York Region, Ontario.

To lessen the potential social and environmental impact, we partnered with Black & Veatch to develop an innovative and environmentally conscious solution. This involved microtunneling to effectively traverse both highly urbanized and ecologically sensitive terrain.

Sydney's Central Railway Station is an iconic landmark at the heart of a revitalization of Sydney's southern CBD. The AUD\$150m Central Station redevelopment is part of the AUD\$2 billion Sydney Metro project and consists of design and construction of the critical Sydney Metro Interchange Station. The latter will be

At GHD, we think beyond tomorrow to anticipate → future challenges

We helped turn a contaminated site into the city's most desirable post code

In extraordinary and challenging times, we are thankful for the things that make us strong. Over this period it has been the leadership and incredible stories of our families, clients, and work colleagues, which have inspired each of us to make a greater difference.

Transforming spaces, reducing impact

Sydney's Central Railway Station is an iconic landmark at the heart of a revitalization of Sydney's southern CBD. The AUD\$150m Central Station redevelopment is part of the AUD\$2 billion Sydney Metro project and consists of design and construction of the critical Sydney Metro Interchange Station. The latter will be

underneath Central Station and the new Central Walk, relieving passenger congestion and enhancing the customer experience. Significant upgrades to the existing Central Station will enable the Metro lines to integrate with suburban, metrocity and regional rail services, as well as buses, coaches and light rail.

Our mission: Turn an investment opportunity into a thriving economy

01 By providing the right technical support and due diligence we made it possible for Napier Ports to off er shares via an IPO and expand.

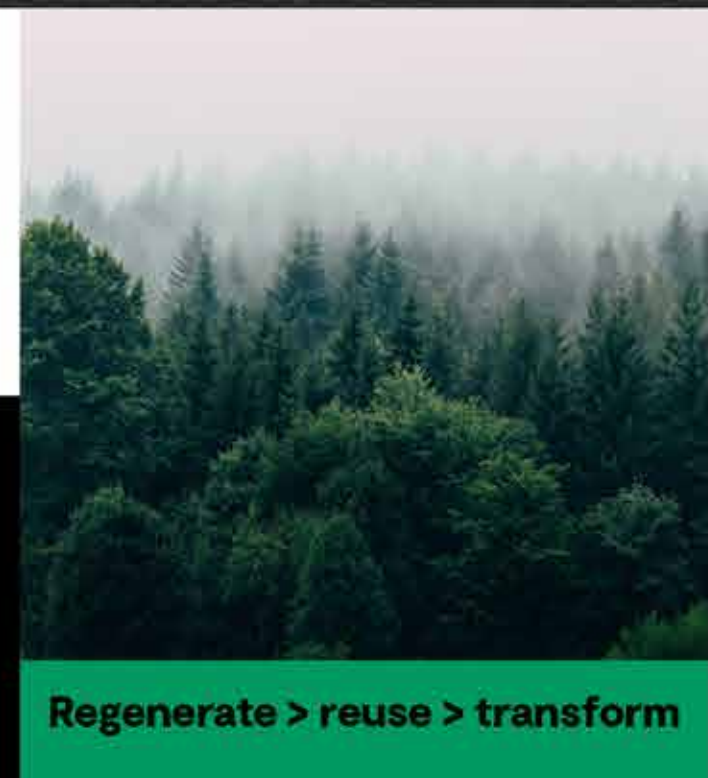

Environment: Transforming spaces, reducing impact. We turn ambitious and challenging concepts into reality while meeting regulatory, community requirements and managing risk.
