COSHH Risk Assessment Portal

A risk assessment is a vital element for health and safety management and its main objective is to determine the measures required to comply with statutory duty under the Health and Safety at Work Act 1974 and associated regulations by reducing the level of incidents/accidents.

A risk assessment will protect your workers and your business, as well as complying with law. As for when to do a risk assessment, it should simply be conducted before you, or any other employees, conduct some work which presents a risk of injury or ill-health.

The **Evans Vanodine COSHH Risk Assessment Portal** is available to all approved Evans Vanodine distributors and customers.

Evans E-Learn Online COSHH Training

Evans E-Learn is an online, RoSPA approved, learning and assessment facility to help with required training and product awareness. Evans E-Learn is FREE for all users of Evans Vanodine products.

The training course is designed to safeguard when using Evans Vanodine products. Users are guided through a detailed overview of COSHH, followed up with sessions on Classification, Health Risks and Control Measures. The course lasts between 20 and 30 minutes and can be completed at a time and place that suits.

Evans E-Learn is a multi-lingual facility, where users can choose to learn in a variety of different languages.

On completion of all sessions, there is a short test. When a pass rate is achieved, an Evans branded certificate is issued, displaying the RoSPA logo, along with user details and pass rate.
