

COSHH Chemical Risk Assessment

Understand chemical hazards, develop controls, mitigate risk

Take a structured, best practice approach to manage COSHH chemical risk assessments.

- ✓ Ensure all chemical hazards are understood
- ✓ Introduce compliant chemical controls
- ✓ Easy to create relevant custom COSHH assessments
- ✓ Efficiently distribute and manage assessments

✓ CUSTOM CHEMICAL TEMPLATES

Organisations within various business sectors have different needs when it comes to COSHH. That is why when using the COSHH module on EcoOnline, you get to design a bespoke template specific to the needs of your organisation. Designing your template will allow you to efficiently deliver focused relevant COSHH assessments to your staff.

✓ ADMINISTRATION AND COMPLIANCE

Ensuring chemical safety compliance for both your organisation and your suppliers can be an administrative nightmare. Allow our team to manage the burden of data entry and compilation for REACH and give you access to simple reports to assess your organisations COSHH compliance. Safety Data Sheets are sourced directly from manufacturers by our team and assessed for compliance with EU & UK legislation.

✓ DATA TRANSFER FROM SDS

All key data from the safety data sheet is inputted into your chemical risk assessments by our SDS services team. This data will be pre-filled on all COSHH assessments built by our end user. The information includes: Full product classification (GHS pictograms, Hazard & Precautionary Statements), list of ingredient substances, list of UK workplace exposure limits (EH40)

Key Benefits

ACCOUNTABILITY

Instant access to information with a single scan or click makes compliance and safety at work easy.

Users can download PDFs of COSHH/ Chemical Assessments quickly.

Efficiently manage user read confirmation from one central location.

ACCURATE HAZARD CALCULATION TOOL

Calculate the degree of risk with mapping tools:

Ability to create complex risk matrices - 3x3, 5x5.

Outline the severity of the risk.

Customise scoring category.

EASY DOCUMENT MANAGEMENT

Manage documents within the COSHH/Chemical Risk Assessment module:

Publish the latest COSHH/chemical assessments with updated revision numbers and dates and archive old assessments.

Log all updates to COSHH/chemical assessments by registered users.

Availability of pre-filled GHS classification information.

Key Features

✓ DOCUMENT MANAGEMENT

- Publish the latest chemical risk assessment and archive old versions. Register all changes.

✓ CHEMICAL RISK MAPPING

- Map out different hazard groups automatically, along with the measures that need to be taken for each

✓ BEST PRACTICE TEMPLATES

- Compliant risk assessments for those working with hazardous chemicals

✓ CUSTOMISED RISK ASSESSMENTS

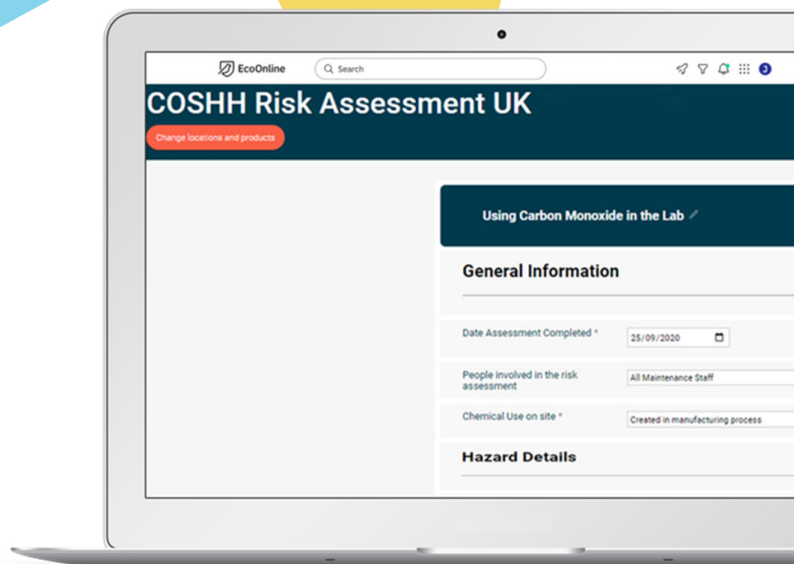

- Create smart risk assessments based on your requirements

✓ RISK ASSESSMENT BUILDER

- Step-by-step process in the creation of risk assessments

✓ DATA TRANSFER FROM SDS

- Data will be pre-filled on all Chemical risk assessments built by the client

“The future of COSHH and Operational Safety Management. Our confidence in EcoOnline grew very quickly, we were supported and guided throughout the installation process. The rewards of using both friendly and fit for purpose systems are great; our end users are very happy.”
