

Risk Management

Understand hazards, develop controls, mitigate risk

Take a structured approach to managing quantitative and qualitative risk assessments.

- ✓ Task-based risk assessments for ease-of-use
- ✓ Flexible approach to hazard assessment
- ✓ Ensure all hazards are understood
- ✓ Develop necessary controls

✓ STRUCTURED RISK MANAGEMENT

The Risk Management module enables you to mitigate risk on company-wide basis. It offers a straightforward approach to quantitative and qualitative risk assessment.

EcoOnline EHS's intelligent Risk Management module guides the assessor through the risk assessment process. It ensures all hazards are understood and allows the assessor to develop necessary controls.

✓ TRACK THE EVOLUTION OF RISKS

EcoOnline EHS can help you to track the evolution of your risks, spot trends and patterns and ultimately mitigate risks.

Powered by graph database architecture. Graph databases are industry leading technology that make better connections between data than other types of database.

✓ CONFIGURABILITY GUARANTEED

All EcoOnline EHS modules have a high degree of configurability baked into the product.

With the flexibility built into the module configuration, it is possible to create simple high-level risk assessments through to complex multi-task activities.

Key Benefits

ENSURE CONSISTENCY

Standardise risk management processes with consistent risk assessment and evaluation methodologies, while supporting contextual risk consequence thresholds for different departments or business areas.

FAMILIAR LAYOUT

Rate hazards using your existing severity matrix to ensure consistency. The familiar and consistent layout of all EcoOnline EHS modules means that you can quickly and easily navigate the risk module, ensuring productivity and efficiency remain high.

MEET CORPORATE OBJECTIVES

Meet corporate objectives by enabling a systemic approach to risk management. Multi-level sign off ensures delivery of quality data and reporting. Integrated action tracking allows for nonconformances to be addressed quickly and effectively.

Key Features

✓ TASK-BASED

- Create a library of task based assessments
- Configurable pre and post control risk ratings
- Understand hazards and develop controls

✓ TEMPLATES

- Use templates to ensure consistency
- Best practice templates for people, task, environmental and process-based risk assessments
- Parent and child template functionality

✓ INTEGRATED ACTIONS

- Create queries on any dataset
- Change query data to pivot your insight
- Edit data dynamically, right in your dashboard

✓ VISUALISATION

- Create risk-based dashboards
- Share dashboards with any other user
- Change graph layouts and size with consummate ease
- Filterable range of output options

✓ NOTIFICATIONS & SCHEDULES

- Use EcoOnline EHS's intelligent email notifications
- Schedule future regular risk assessments

✓ MY TASKS

- Use My Tasks view to instantly see which risk assessments are assigned to you
- Group by module or get a holistic view of your tasks
