We are Uptick.

We provide world-class software for people that care about asset maintenance and compliance.

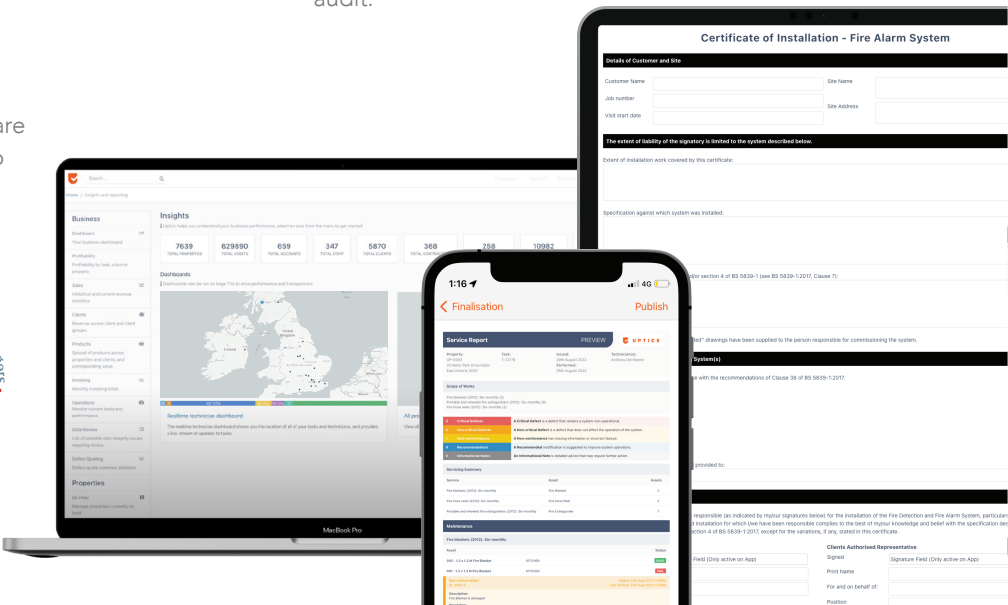

Solutions to help you grow faster and stronger.

Uptick is the leading software provider to fire & security maintenance providers. Our software helps servicing companies manage their workforce to perform asset maintenance activities, keeping buildings safe and compliant.

As a member of the FIA, FPA and IFSM you can be sure that Uptick is always aware of the latest legislation and has access to the best technical advisors and training available.

Fire Protection Association

- Save time and meet requirements with our built-in British Standards, including BS 5839 and BS 7273.
- Take advantage of our pre-built reports and certificates for BAFE, NSI and SSAIB accreditations to help streamline your workflows and improve operations.
- Our comprehensive field servicing solution has been built for all areas of fire protection, covering passive, active and audit.

Modern software designed for the future of building maintenance.

Not just another job management software.

Uptick is an asset-centric software purpose-built for the fire and security industry.

Our very first UK customer, **Beacon Fire Protection** have reported a gross profit increase of 36% in the last 12 months. With the help of Uptick, they've been able to:

We're working towards our vision of making the compliance of every building in the world visible in real-time.

Uptick is used across:

Save admin time and costs

Remove all pen and paper and automate your workflows.

- 5000+ Engineers
- 450,000+ Buildings
- 6M+ Assets
- 3+ Countries
- 300+ Companies
- 60 employees

"Uptick has saved at least 25-30 hours of work per week"

Improve engineer efficiency

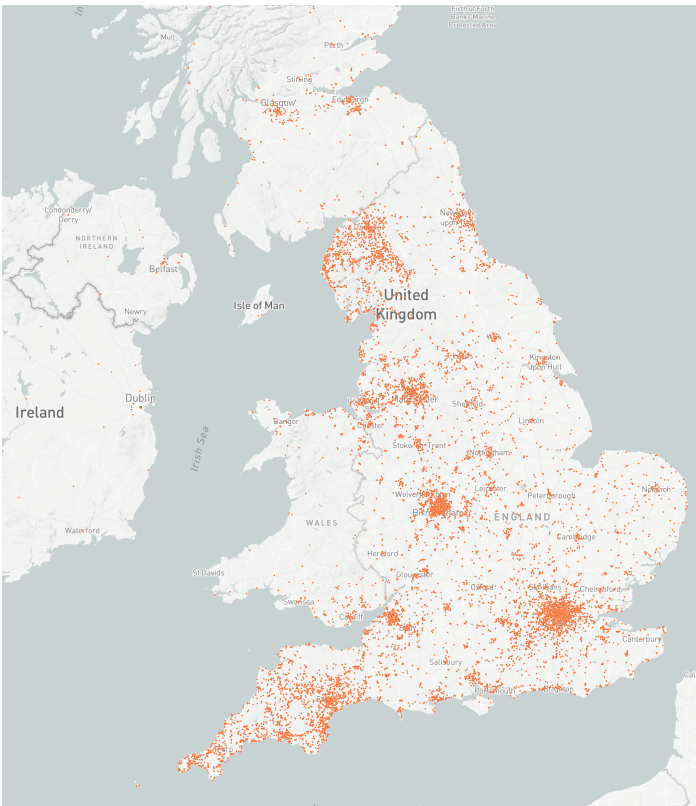

Don't waste time with bad scheduling or lack of information in the field.

"Engineers are getting through 1-2 extra jobs a week"

Increase revenue from customers

Impress customers with a beautiful compliance portal and photographic reports.

"We have won 270 customers and increased our defect quote conversion by double"

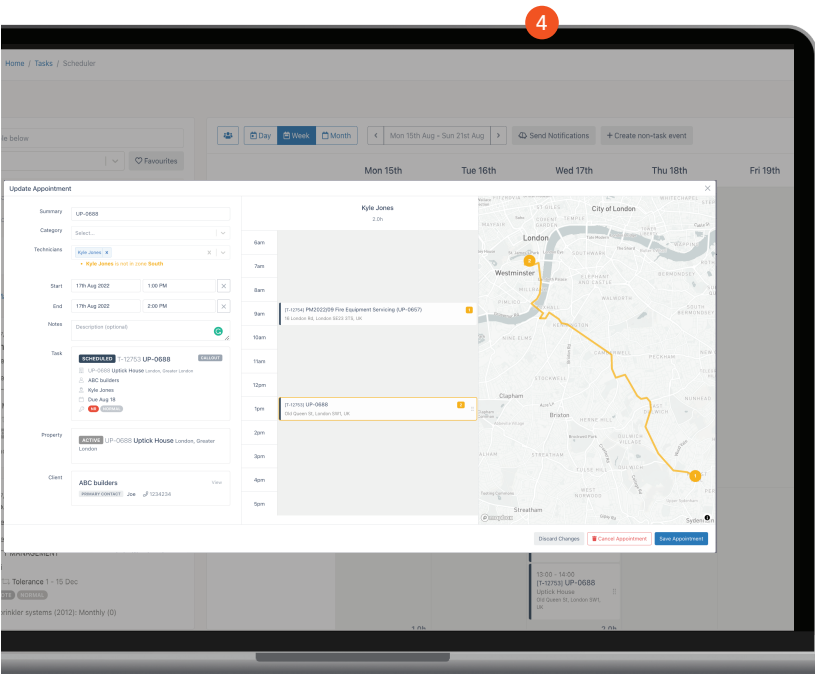

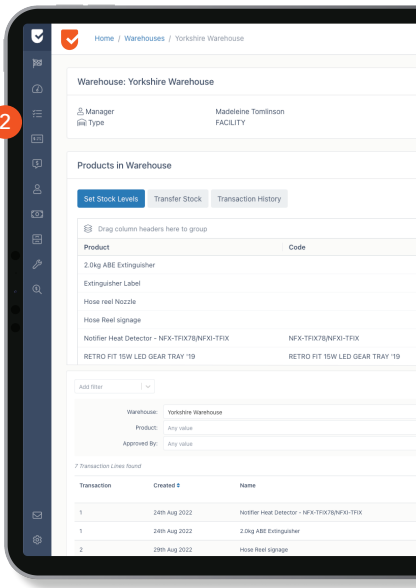

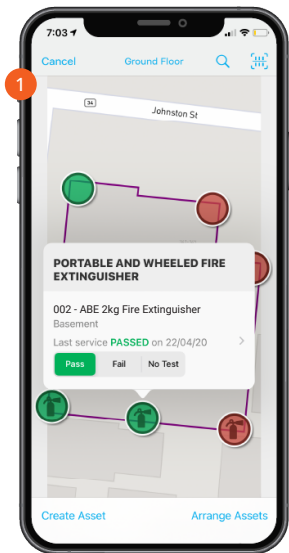

Make the switch to Uptick. You'll be in **great** company.

Grow your business with leading product features.

Purpose built for the asset protection industry with smart business tools and advanced technology.

- 1 Increase efficiency and allow fire engineers to solve problems in a fraction of the time with an easy-to-use mobile App
- 2 Enable more accurate job costing and the ability to manage your warehouse inventory with our stock control module.
- 3 Give your clients insights, not just PDFs, by providing the ultimate level of transparency with a Customer Portal they will actually use.
- 4 Schedule the way you want. Increase billable hours, reduce downtime and allocate tasks by engineer, location or skill-set.
