

The True Digital Fire Logbook and Compliance Manager

tiofiresafety.com

Fire and Safety Software from Industry Experts

Tio is the leading digital fire and safety records company. Our software is used by building professionals, occupiers, FMs and service & maintenance companies across the UK.

We created Tio because of our frustrations as estates managers, building owners and occupants and service and test professionals. Five years on and new standards are arriving underlining the importance of digital records, clarity and communication in the golden thread of building safety information.

Tio is the right software at the right time. There is no other true digital fire logbook and compliance manager on the market.

Tio replaces all your paper logbooks, document storage boxes, compliance task management software, reporting and paperwork. It radically improves your safety records and processes, all for the price of a paper fire logbook.

Set up is quick and simple. Please contact us for demos, trials or sales enquiries.

Tio Completes the Compliance Jigsaw

Compliance Assistant

Tio schedules and notifies relevant users what needs doing, when and how. Daily, weekly, monthly and annual duties are scheduled, reminded and guided. Notifications are highlighted at login and tasks easily completed. You can also connect Tio's asset and service management software for unprecedented information from assets up.

Multiple Paper Logbooks Replaced Quickly

One Tio logbook replaces logbooks from fire detection to emergency lighting, security to electrical safety. Tio is set up in a few clicks, there is no long or expensive onboarding.

Secure Document Storage

Tio replaces all your paper document storage. All your virtual logbooks, audit trail and records are stored securely in the cloud. Never damage or mislay a logbook, or lose your compliance records. Add in all of your documentation from manuals and training records to risk assessments and reports. Anything and everything is ready when you need it.

Availability and Access

Tio's cloud platform improves record integrity, transparency and accessibility. All users involved in a site can access, view and update records with access to data and sites set by their role and permissions. We can also connect Tio to your existing management software.

Team Management

Tio brings your staff, facilities managers and service providers together to ensure actions and responsibilities are clear, so tasks and issues can be resolved quickly. Those with legal responsibility for fire safety know site status quickly and easily.

Performance Dashboards

Whether one or one thousand premises, Tio's dashboards show you the status of your fire safety tasks and issues at a glance by premises, sites, teams, service provider or team member. Get an estate-wide view of compliance or dig into the detail.

Scan, Print and Share

Your logbook should be available to all interested parties. With Tio you can print it and hand it over, or share it digitally by scanning the QR code that we supply.

Risk Assessment Manager

Tio allows fire and safety risk assessments to be added or imported. Observations and recommendations can be tracked to closure.

Checklists and Guidance

Tio helps your teams tasks quickly and clearly, with guidance available from the British standards.

False Alarm Management

False and unwanted alarms undermine faith in life safety systems and waste valuable resources. Recording and sharing the details helps remedy the problems they create and prevent their recurrence.

Variations and Site Information

Variations and important info on the site such as keyholders, dangerous contents and monitoring stations are logbook recommendations often overlooked. Tio has a place for all of these, ensuring the staff and partners that need the information to do their jobs always have it when they need it.

Rapid Asset Management

Tio's optimised asset management software can show all your fire and safety assets and maintenance history in your logbook.

Replace Paper Logbooks and Improve Safety Processes

Tio is built around fire safety topics and with a click, can cover many other areas of safety and replaces and improves many logbooks and records. We add new topics frequently based on customer requests.

The True Digital Fire Logbook

Logbooks £30 per annum
(£2.50 per month).

Volume discounts and
reseller accounts available.

Faster Set Up Easier to Use Exceptional Support

Tio is largely pre-configured which means you can be up and running in seconds. Getting started is just as easy as opening and writing in your old paper logbook, but with vastly superior safety, legal and efficiency benefits.

At Tio, we've done the hard work on configuration, scheduling and management so you don't need to. Unlike our competitors, we don't expect you to have to manage and work through an on-boarding process so complicated it takes weeks and requires an extra fee.

We know compliance processes are often well established and if you need our system to supply data to your existing software we can use one of our APIs or create a new one.

We can get you up and running quickly and even convert your existing paper logbooks to Tio. For the life of your subscription (minimum 12 months contract per logbook) we'll support you with quick, knowledgeable customer support and account management.

Tio Rapid Asset and Service Management

Tio also offers an unbeatable fire, security and safety asset and service management product for your service providers or in-house teams. It's pre-configured with most equipment types and data.

- Create building designs and locate rooms and assets
- Quickly survey the assets on site
- Tag floors, locations and assets with barcodes/QR codes or use existing or off the shelf codes
- Create detailed asset histories as you test and maintain
- Full task management for maintenance teams
- Produce standard and custom reports and certificates
- Full asset history and audit trail
- Import FD&A assets from panel TOC files
- Create or use standards driven checklist for assets and tasks
- Base pass or fails on checklist responses or simply pass or fail based on engineer training
- Use stand alone or integrated into Tio's logbook and compliance management software.

Priced to work alongside or integrate into your existing processes and service management software. Contact us for a demo and pricing.
