

Revenue-Share Programme Exclusive to Service Providers

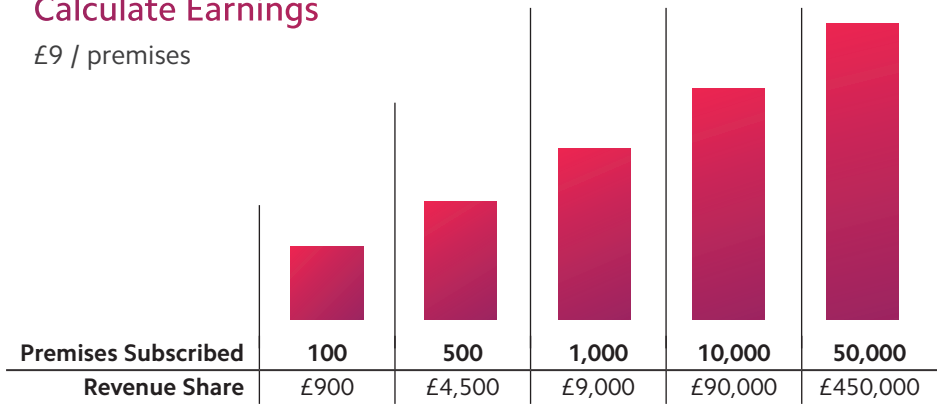

Want to earn more from every service visit without tying up valuable sales, engineering and accounts resource?
Become a partner and get paid for introducing and using Tio.

Here's how it works

1. Using your account, invite your customers to try Tio
2. We'll guide them through Tio's best features
3. They subscribe for £30 / Building / Year
4. You get paid

Calculate Earnings

£9 / premises

Additional Partner Benefits and Information

What is Tio?

Tio is an independent low-cost fire safety application that guides and reminds those responsible for buildings of their legal obligations and duties, storing records in the cloud, available 24/7 to whoever needs, on and off site. Tio also integrates with, and enhances existing software and systems, proving compliance through a golden thread that stays with the building.

Improve efficiency & communication

Engineers can easily make logbook entries, review pending remedial works and see the entire history of a building on and off-site. Saving time and effort, ensuring that they always arrive with the correct equipment and understand what is required.

Remedial works actioned faster

Add reports, recommendations, proposals and quotes to customer accounts and create tasks for responsible people to action. Tio sends reminders to ensure remedial works do not fall down the priority list.
