Track stock and keep warehouse managers informed

Keep an eye on stock levels and manage the flow of materials from the warehouse, in transit and to the job site. View the quantity and value of items assigned to jobs, review multiple supplier invoices and see which of your catalogue items have become inactive over time using stock and supplier reports in simPRO.

Stock Value Report

Manage and cost projects with ease

Generate snapshot reports to view your work in progress, cost to complete, a list of jobs at all stages and other details to surrounding project progress and finances. Project and job reports in simPRO help identify bottlenecks, measure KPIs, monitor budgets and gain increased visibility into your workflow.

WIP Report

Customised business reports for your unique needs

Use Business Intelligence reporting features to extract data from your simPRO build for customised reports, dashboards and data visualisations. Apply filters to locate specific categories of information and develop charts to easily view trends.

BI Reporting Dashboard

BI Reporting Premium

Use the BI Reporting Premium add-on to pull data in simPRO based on specific SQL queries. With the Pulses feature, you can schedule automated reports via email to receive information at designated intervals. Reach out to your Business Development Manager for add-on pricing.

The BI Reporting Premium add-on is included at an additional cost to your primary simPRO licence. Ask your Business Development Manager for pricing information.

5,500+ businesses trust simPRO for field service management

“The best part [of simPRO] for me is definitely the reporting. That is something that we’ve only really just scratched the surface of, and we can already see some great data sets and analysis becoming available.”

— Carl Murray, Chillmech Services
